Phone: (805) 882-3600 • Fax: (805) 882-3601
<http://www.LessIsMore.org>

The Recycling Resource Guide for Santa Barbara County (Guide) has been prepared by the Collections and Materials Management section. Funding for the Guide has been provided by the County of Santa Barbara Public Works Department; the Cities of Goleta, Santa Barbara, and Solvang; and the California Department of Resources Recycling and Recovery (CalRecycle). Listings in this Guide should not be construed as an endorsement by the County of Santa Barbara Public Works Department. To see updates to this Guide until the next edition is printed, please visit the County of Santa Barbara's recycling website at:

www.LessIsMore.org.

Permission to reproduce this Guide for non-profit purposes is hereby granted.

If your business or organization would like to be included in this Guide in future editions, please call our office at (805) 882-3600.

Special thanks to the following people for helping to research and verify the completeness and accuracy of the information: Leslie Robinson, Jody Rundle, Sheila de la Guerra, John Norris, Keith Stoodley, and Mark Tautrim of the Resource Recovery & Waste Management Division.

Also, thank you to members of the following agencies for reviewing their entries for completeness and accuracy: Cities of Carpinteria, Lompoc, and Santa Maria, MarBorg Industries, Waste Management, and Tetra Tech on behalf of Vandenberg Air Force Base.

Also, a special thank you to Jody Rundle for helping to proofread the document.

2012-2013 EDITION

Dear Residents and Business Owners of Santa Barbara County:

Under the California Integrated Waste Management Act of 1989 (Assembly Bill (AB) 939), jurisdictions in California were required to divert at least 50 percent of their waste from landfills by the end of 2000. More recently, in October 2011, under AB 341, California established a new goal for the State to divert at least 75 percent of its waste by 2020. The County of Santa Barbara, encompassing the unincorporated areas of the County and the City of Goleta, has diverted 73 percent of its waste, thereby far exceeding the AB 939 mandate, conserving resources, and extending the life of area landfills.

Without the cooperation and participation of the community, however, the County of Santa Barbara could not have reached such a high diversion rate. Although attaining a diversion rate of 73 percent is impressive, much more can be done. Therefore, we will continue working with the community to expand our existing programs and to add new programs wherever possible in order to attain and surpass the 75 percent diversion goal.

In order to maintain and increase the County's diversion rate, households and businesses need to continue to recycle at home, at work, at recreational facilities, and when they are remodeling. By using this **Recycling Resource Guide** (Guide), you will find useful information and resources to help you learn how to prevent the creation of waste, and to reuse or recycle products and materials that you have used. Also, for business and rental property owners who have yet to begin recycling, the Guide contains a step-by-step process for starting a recycling program.

If you have any questions or suggestions for improving the Guide, please contact the Resource Recovery and Waste Management Division at (805) 882-3600 or send an e-mail message to anakash@cosbpw.net.

Sincerely,

A handwritten signature in black ink that reads "Mark A. Schleich". The signature is written in a cursive, flowing style.

MARK SCHLEICH, Deputy Director
Public Works Department
Resource Recovery and Waste Management Division

Recycling Services and Collection Sites

In the unincorporated areas of Santa Barbara County, a convenient recycling program for residents is in place. Recyclables are collected in commingled containers, meaning that all materials that can be recycled may be placed in a single container for pick-up by your solid waste service provider.

MATERIALS THAT CAN BE RECYCLED IN THIS PROGRAM INCLUDE:

- **Aluminum foil** and pie plates (must not have residue from food or beverages)
- **Cans** of all types (aluminum, steel, tin, bimetal) (and empty aerosol cans)
- **Glass** containers
- **Newspapers** and all inserts
- **Mixed paper** (includes any glossy or non-glossy paper such as office paper, magazines and junk mail; no waxed or laminated paper)
- **Paper bags**
- **Paperboard and cardboard** (e.g. cereal and tissue boxes)
- **#1 PETE plastic** containers (Polyethylene Terephthalate)(e.g. small sport top water bottles; soft drink, mouthwash, ketchup, and salad dressing bottles; peanut butter, jelly and jam, and pickle jars; food trays)
- **#2 HDPE plastic** containers (High Density Polyethylene)(e.g. milk, water, juice, cosmetic, shampoo, dish and laundry containers; yogurt and margarine tubs)
- **#3 PVC plastic** (Polyvinyl Chloride) (e.g. detergent/cleanser bottles, pipes)
- **#4 LDPE plastic** (Low Density Polyethylene) (e.g. squeezable bottles such as honey and mustard)
- **#5 PP plastic** (Polypropylene)(e.g. ketchup bottles, yogurt containers, margarine tubs, and empty medicine bottles)
- **#6 PS plastic** (Polystyrene)(e.g. compact disk cases, clean plates and empty medicine bottles)
- **#7 Other plastics** (e.g. three- and five-gallon reusable water bottles; ketchup, juice, and syrup bottles)
- **Pots and pans** (e.g. aluminum, copper, or steel)
- **Telephone books**

Preferably, rinse glass bottles and jars and metal cans to minimize the residue from food and liquids.

Metal lids should be removed from glass jars, and caps from plastic containers should be removed since they are a different type of plastic.

MATERIALS THAT ARE NOT ACCEPTED IN COMMINGLED RECYCLING PROGRAM:

- Aerosol cans (if contents are in can)*
- Automotive fluids*
- Batteries*
- Chemicals*
- Electronics**
- Fluorescent lights*
- Paints/solvents*
- Paper towels
- Pottery
- Styrofoam (if clean, many packaging stores will accept the peanuts)
- Tissue and toilet paper
- Waxed cartons (e.g. milk or juice cartons and frozen food boxes)
- Window glass or incandescent light bulbs

* Take to your local hazardous waste collection facility to be recycled. Household batteries may also be dropped off at some stores that sell electronics, camera stores, drugstores, office supply stores, and home improvement stores.

** Contact the County of Santa Barbara Resource Recovery & Waste Management Division of the Public Works Department at (805) 882-3615 to obtain information on the nearest location where you can take your electronic items to be recycled or reused.

Please note that Styrofoam, packing peanuts, plastic egg cartons, and electronics should NOT be placed in your commingled recycling container. Generally speaking, only **hard** plastics may be placed in your commingled recycling container.

Many mail and packaging stores accept packing peanuts to be recycled or reused. Contact a local store to verify that clean packing peanuts will be accepted. Electronics should be taken to a facility that collects such items for recycling or dropped off during one-day collection events held periodically throughout the County. For a list of facilities that accept electronics, please visit: www.LessIsMore.org/Programs/electronics.html.

Effective July 1, 2011, **clean plastic film such as plastic bags of all types, bubble wrap, and shrink wrap**, may be placed in commingled recycling containers in Santa Barbara County. Please note that customers of Waste Management should place the plastic bags in a plastic bag before depositing it into the recycling container, while customers of MarBorg Industries may place the bags in the container loose.

Also, please note that the following types of **plastic bags** are **accepted at major grocery stores** to be recycled:

- a) Grocery bags;
- b) Bread bags, if there is no residue;
- c) Retail bags with the hard plastic and string handles removed;
- d) Newspaper bags (must be clean and dry);
- e) Dry cleaning bags;
- f) Clear bags labeled with a #2 or a #4.

Customers with residential recycling service in the **unincorporated** areas of the County may also have **household batteries** collected curbside for recycling. The household batteries should be placed in a clear plastic bag and placed on top of the household's blue recycling container on collection day. To prevent **rechargeable batteries** from catching fire, tape the positive ends with clear tape. Customers in apartments and condominiums with centralized trash and recycling service should consult with their property manager to determine the nearest household battery collection location.

In addition, single-family households in the **unincorporated** areas of the County may contact their local waste hauler, MarBorg Industries or Waste Management, to request a postage-paid container for the **collection of sharps (needles)**. The household may then mail the package to the pre-addressed location, where the sharps will be processed for proper disposal. Finally, single-family households in the unincorporated areas of the County may now make two requests per calendar year to have bulky items picked up by their waste hauler, including electronic waste.

In addition to the above listed recyclable materials, **green waste** is also collected at the curbside and containers are provided by your hauler. Green waste consists of leaves, grass clippings, and other yard trimmings and plant material. Food waste, wood ash, soil, and other yard implements (old hoses, tools, plant pots, etc.) are not acceptable materials to place in the green waste container.

In the South Coast of Santa Barbara County, green waste is either collected at the curbside or self-hauled to the South Coast Recycling and Transfer Station, where it is processed into mulch for beneficial reuse. A Quality Control Program removes inappropriate materials (e.g. painted wood, pressure treated wood, and plywood) and magnets remove ferrous metals. The mulch is widely

used in local agriculture, and for erosion control, landscaping and other uses by a variety of end users, including Lotusland, Alice Keck Park Memorial Gardens, and local schools and churches. Residents may help themselves to free mulch at the South Coast Recycling and Transfer Station, or may have larger amounts delivered at a cost. Call (805) 681-4345 for more information.

To participate in this program, you may contact your service provider directly for schedules and bin delivery. If you would like to recycle materials not included on this list, check the list of materials on pages 16-53 for additional recycling resources. For additional information on the services offered in your area, please contact the service provider listed for your locality.

In the North County unincorporated areas, the green waste collected from residential customers by Waste Management is taken to its Materials Recovery Facility, where it is ground and then transported to a commercial composter. Green waste collected from commercial customers and from roll-off containers is ground into mulch, which is then donated or sold to orchards and farms. In the City of Santa Maria, green waste that is collected curbside is sent to a commercial facility that converts the material into compost, and this compost is available for purchase. In the City of Lompoc, green waste collected from residential and commercial customers is ground and used as Alternative Daily Cover at the City's Landfill. The City of Lompoc's Urban Forestry Division offers free mulch to both households and businesses, when available.

Businesses in the unincorporated areas of the County that want information on the County's Commercial Recycling Program may contact the County of Santa Barbara Public Works Department, Resource Recovery and Waste Management Division, located at 130 East Victoria Street, Suite 100, Santa Barbara, CA 93101, telephone: (805) 882-3616.

If you would like more information on the destination of your trash and recyclables, you can contact the appropriate transfer station or landfill for your area. Transfer stations are intermediary sites that collect and sort a variety of materials, both recyclable and non-recyclable. The recyclable material is later delivered to Material Recovery Facilities (MRFs) where it is sorted, baled, and then sold. The non-recyclable materials are hauled to a landfill, where they are covered daily in a system of compacted layers.

Service Providers in Santa Barbara County—

INCORPORATED AREAS:

Residents and businesses within the Cities of Carpinteria, Goleta, Santa Barbara, Buellton, Guadalupe, Lompoc, Santa Maria, and Solvang should contact their cities directly for information on recycling programs.

City of Buellton
(805) 686-0137

City of Carpinteria
(805) 684-5405, ext. 411

City of Goleta
(805) 961-7500

City of Guadalupe
(805) 343-1340

City of Lompoc
(805) 875-8024

City of Santa Barbara
(805) 564-5631

City of Santa Maria
(805) 925-0951, ext. 7270

City of Solvang
(805) 688-5575

Vandenberg Air Force Base
(805) 605-0544 or
(805) 605-3615

UNINCORPORATED AREAS:

SOUTH COAST:

MarBorg Industries
P.O. Box 4127 (93140)
728 East Yanonali Street
Santa Barbara, CA 93103
Tel: (805) 963-1852
Fax: (805) 962-0552

Service areas: Summerland, Montecito, Carpinteria Valley, Hope Ranch, Mission Canyon, unincorporated Goleta, and Isla Vista

NORTH COUNTY:

Waste Management
1850 West Betteravia Road
Santa Maria, CA 93455
Tel: (805) 922-2121
Fax: (805) 922-4710

Service areas: Lompoc Valley, Santa Ynez Valley, and Santa Maria Valley

TRANSFER STATIONS AND LANDFILLS—SOUTH COAST

MarBorg Industries Construction & Demolition (C&D) Debris Facility
119 North Quarantina Street
Santa Barbara, CA 93103
(805) 963-1852

This transfer station is used to sort recyclable materials brought in by waste collection services as well as contractors and residents. The facility can process up to 1,250 tons of material per day. The types of materials accepted at this facility include mixed construction and demolition debris, green waste, metal, general recyclable materials, and household appliances. No hazardous waste is accepted here.

The MarBorg C&D facility is open Monday through Friday from 7:00 a.m. to 5:00 p.m. and on Saturdays from 7:00 a.m. to 4:00 p.m. It is closed on Sundays, New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day. Please call (805) 963-1852 for more information.

South Coast Recycling and Transfer Station
4430 Calle Real
Santa Barbara, CA 93110
(805) 681-4345

This facility opened in 1967 and can process up to 550 tons of waste per day. This transfer station serves as a central collection point for a large portion of the non-hazardous waste generated on the South Coast. The station receives commercial roll-off containers, as well as waste brought in by residents and small, non-franchised haulers (e.g. landscapers). The remainder, comprised of trash, is taken directly to the Tajiguas Landfill by franchised haulers seeking to take advantage of the lower tipping fees. The South Coast Recycling and Transfer Station is also home to a recycling center that processes approximately 200 tons per day of recyclable materials, including electrical appliances, vehicular batteries,

bicycles, Christmas trees, construction and demolition debris, electronic items, used tires, and wood and yard waste.

The South Coast Recycling and Transfer Station is open to the public Monday through Saturday from 8:00 a.m. to 5:00 p.m. It is closed on Sundays, New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day. If you have any questions, please call (805) 681-4345.

Tajiguas Landfill
14470 Calle Real
Goleta, CA 93117
(805) 696-1170

This landfill serves the unincorporated areas of the County, including the Santa Ynez and New Cuyama Valleys, and the Cities of Buellton, Goleta, Santa Barbara, and Solvang, and can process up to 1,500 tons of trash per day. The Tajiguas Landfill is open Monday through Friday from 7:00 a.m. to 3:30 p.m. and Saturdays from 7:00 a.m. to 1:00 p.m., but is closed on Sundays, New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day. When one of these holidays falls on a weekday, please call ahead to determine whether or not the Landfill will be open on another day. No public dumping is allowed at the Tajiguas Landfill, so all South County self-hauled waste must be taken to the South Coast Recycling and Transfer Station.

TRANSFER STATIONS AND LANDFILLS—NORTH COUNTY

City of Lompoc Landfill

Avalon Road (south end)
Lompoc, CA 93438
(805) 875-8024 or
(805) 875-8027

The City of Lompoc's Landfill serves the City of Lompoc and the unincorporated areas of Mesa Oaks, Mission Hills, and Vandenberg Village. The Landfill is located at the south end of Avalon Road and is open Monday through Friday from 7:30 a.m. to 4:00 p.m. and on week-ends and holidays from 10:00 a.m. to 3:45 p.m.

City of Santa Maria Landfill

2065 East Main Street
Santa Maria, CA 93454
(805) 925-0951, ext. 7270

The City of Santa Maria's Landfill serves the City of Santa Maria and the unincorporated areas of the Santa Maria Valley. The Landfill is open seven days a week from 7:00 a.m. to 4:00 p.m. It is closed on New Year's Day, Easter Sunday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

Santa Ynez Valley Recycling and Transfer Station

(formerly known as the Foxen Canyon Landfill)
4004 Foxen Canyon Road
Los Olivos, CA 93441
(805) 688-3555

The Santa Ynez Valley Recycling and Transfer Station is a County operated facility that can process up to 212 tons of waste per day. It services the Santa Ynez Valley and the Cities of Buellton and Solvang, and is open to the public Tuesday through Saturday from 8:30 a.m. to 4:00 p.m. It is closed on New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day. If you have any questions, please call (805) 688-3555.

New Cuyama Transfer Station

5073 Highway 166
New Cuyama, CA 93254
(661) 766-2284

New Cuyama Transfer Station is on a 0.9 acre site within the community of New Cuyama that had previously been used as a road yard by the Transportation Division. This facility can process up to 99 cubic yards of waste during each day that it is open. Waste from the New Cuyama Transfer Station, containing a high percentage of recyclables, is taken to a recycling facility, where the recyclables are removed and processed. The residual waste is then transported to the Tajiguas Landfill, located in Goleta, California. The New Cuyama Transfer Station is open on Wednesdays, Fridays, and Sundays from 12:00 noon until 6:00 p.m. during Pacific Daylight Savings Time (from the second weekend in March to the first weekend in November) and from 11:00 a.m. to 5:00 p.m. during Pacific Standard Time (from the first weekend in November to the second weekend in March). There are no tipping fees at this facility, which accommodates local residents only.

Vandenberg Air Force Base Landfill

Building 9505,
6th Street and Utah
Vandenberg Air Force, CA 93437
(805) 606-7571

The Vandenberg Air Force Base Landfill is located on North Vandenberg AFB, just southeast of the intersection of Washington and New Mexico Avenues. This facility is a 172-acre permitted municipal solid waste landfill that serves base residents and personnel only. It is managed by the Operations Flight (30 CES/CEO), who contracts out the daily operations. Privately owned vehicles are not authorized to enter the landfill for waste disposal. Disposal outside of the landfill is illegal. Active screening

is conducted at the landfill in the following locations: scale house, wood pile, and active face. The landfill is open Monday through Friday from 7:30 a.m. to 3:30 p.m., and is closed on Saturdays, Sundays and on Federal holidays.

Ventucopa Transfer Station

Highway 33
Ventucopa, CA 93254
(805) 448-7489

The Ventucopa Transfer Station can process up to 80 cubic yards of waste per day. Waste from the Ventucopa Transfer Station, containing a high percentage of recyclables, is taken to a recycling facility, where the recyclables are removed and processed. The residual waste is then transported to the Tajiguas Landfill, located in Goleta, California. The Ventucopa Transfer Station is open on Thursdays and Saturdays from 12:00 noon until 6:00 p.m. during Pacific Daylight Savings Time (from the second weekend in March to the first weekend in November) and from 11:00 a.m. to 5:00 p.m. during Pacific Standard Time (from the first weekend in November to the second weekend in March). There are no tipping fees at this facility, which only accommodates residents of the Ventucopa area of Santa Barbara County.

Recycling Terminology

ABOP is an acronym for anti-freeze, batteries, oil, and latex paint. An ABOP center is a facility that only accepts these types of household hazardous waste and oil filters.

Aluminum is a lightweight, silver-white, metallic element that makes up approximately seven percent of the Earth's crust. Aluminum is used in a variety of ways, most commonly in the manufacture of soft drink cans. It can be recycled through curbside collection, buyback centers, or drop-off centers. This includes aluminum cans, pie plates, and aluminum foil.*

Biodegradable refers to an item that has the ability to break down or decompose back into the natural environment, without causing harm (e.g. a substance that biodegrades into carbon dioxide, water, and other naturally occurring minerals). There are other items or materials that break down in a more harmful manner by leaving harmful chemicals or substances in the soil. A product that is truly biodegradable will break down fairly quickly (not take years), not leave anything harmful behind, and save landfill space.**

Buyback Centers are facilities (with staff or no staff) that accept certain recyclable materials for which there is value. Such centers pay cash, by weight, and/or receive donated materials. In the County of Santa Barbara, the commodities collected include glass, aluminum, bi-metal (tin) cans, scrap metals, #1 PETE plastics, opaque and transparent #2 HDPE plastics, #3 through #7 hard plastics, plastic films such as plastic bags, shrink wrap, and bubble wrap, cardboard, newspapers, magazines, and junk mail.

Cathode Ray Tube (CRT) is the glass in picture tubes found in televisions, computer monitors, and other video display devices that amplify and focus high-energy electron beams to create an image ultimately seen on the screen. The glass in the CRT contains lead, in order to protect a consumer from exposure to radiation.

Certified Redemption Centers are facilities certified by the California Department of Resources Recycling and Recovery (CalRecycle) to accept items covered under California's bottle bill for recycling. The Centers are located at many supermarkets and accept recyclable glass, plastic, and aluminum beverage containers marked with California Redemption Value (CRV). Each machine accepts a single commodity, refunding the current CRV.

Christmas Tree Recycling is done seasonally, and residents are notified on how to recycle their trees through flyers, posters, and in advertisements in newspapers and on the radio.

Close the Loop is a term used to describe the last and most important step in the recycling process. It refers to the point when a consumer buys a recycled product after it has been put into a recycling program and reprocessed into a new item.*

Compost is a mixture that consists largely of decayed organic matter and is used for fertilizing and conditioning land. It is material produced from a process whereby bacteria in soil is mixed with degradable trash to form an organic fertilizer and soil conditioner.* Composting is the biological decomposition of organic debris such as leaves, grass clippings, fruit and vegetable trimmings, and other organic materials commonly found in municipal waste.

Construction & Demolition Debris (C&D) is material generated during construction, remodeling, repair, cleanup, or demolition operations, including asphalt, concrete, brick, lumber, gypsum wallboard, cardboard, roofing material, ceramic tile, carpeting, plastic pipe, and steel. Much of this material is recyclable.

Corrugated Cardboard is cardboard containing a ridged lining.

Curbside Collection is the process whereby aluminum, bi-metal (tin) cans, mixed glass, mixed paper (includes any gloss or non-gloss paper such as office paper, magazines, and junk mail), #1 PETE and #2 HDPE plastics, #3 through #7 hard plastics, clean plastic film, newspaper, paperboard (e.g. cereal and tissue boxes) and corrugated cardboard in recycling containers are collected curbside from single-family homes.

Drop-Off Centers accept materials that have been separated. Such centers receive donated materials only and do not pay cash for the materials. In the County of Santa Barbara, the commodities collected at drop-off centers include newspapers, magazines, office paper (white and colored), cardboard, glass, aluminum, bi-metal cans (tin), scrap metals, #1 PETE plastics, opaque and transparent #2 HDPE plastics, and #3 through #7 hard plastics.

Electronic Waste (E-waste) encompasses a broad array of electronic devices such as computers, monitors, printers, copiers, fax machines, scanners, televisions, radios, audio and video cassette recorders, compact disk and digital video disk players, turntables, amplifiers, receivers, speakers, camcorders, MP3 players, and cell phones.

Glass is a hard, brittle, generally transparent or translucent material typically formed from the rapid cooling of liquefied minerals. Most commercial glass is made from

a molten mixture of soda, ash, sand, and lime. Glass can be recycled through curbside collection, buyback centers, or drop-off centers.*

Green Waste is “yard waste” that comes from yards and gardens, and includes such items as grass clippings, small branches, leaves, ivy, and garden waste. Green waste can be recycled through curbside collection and at area landfills and transfer stations.

Household Hazardous Waste (HHW) is any material discarded from a home or a similar source that is ignitable, corrosive, reactive, or toxic, and therefore, can threaten human or animal health and the environment when improperly discarded. Examples of HHW include used paint, used oil, pool chemicals, cleaning products, and insecticides commonly found in the home.*

Landfill is a facility where municipal solid waste is disposed in a series of compacted layers and the waste is covered daily with soil and other types of materials. Fill areas are carefully prepared to prevent nuisances or public health hazards, and clay and/or synthetic liners are used to prevent releases to groundwater.**

Mulch is ground-up or mixed yard trimmings placed around plants to prevent evaporation of moisture, the freezing of roots, and to nourish the soil.**

Multi-Family Recycling is a system of collecting separated or commingled recyclables at multi-family dwellings (e.g. apartments, condominiums, and mobile home parks) with specialized containers and collection equipment to segregate, transport, and unload these materials for processing.

Municipal Solid Waste (MSW) is comprised of everyday items such as product packaging, grass clippings,

furniture, clothing, bottles, food scraps, newspapers, appliances, paint, and batteries. Technically, it includes household waste, commercial solid waste, nonhazardous sludge, hazardous waste from conditionally exempt small quantity generators, and industrial solid waste.*

Paper is a material made of pulp from wood, rags, or other fibrous materials that is used for writing, printing, and wrapping.* It can be recycled at the drop-off centers listed in this directory and through curbside collection programs. This includes office paper, colored paper, junk mail, cereal boxes, and cardboard.

Plastic is a material made from petroleum that can be molded, extruded, or cast into various shapes.* See page 11 for a description of the different types of plastic and examples.

Pollution pertains to the contamination of air, soil, or water with harmful substances.*

Post-Consumer Content is material or a product that has been used by consumers and then reused/recycled, as opposed to those scrap materials produced by and then recycled within manufacturing processes (e.g. a newspaper returned to a paper mill recycled into new recycled content paper products). It is material or a product used by the consumer for its original purpose and then discarded. Packaging often lists the percentage of recycled content (e.g. 50 percent) and then the percentage of that which is post-consumer content (e.g. 10 percent).*

Pre-Consumer Content is a term used to describe material that is being reused/recycled before it ever goes to market (e.g. paper scraps from a paper mill floor going back into the next batch of paper). It is waste material generated during the manufacturing process.*

Corrugated Cardboard

.....Electronic Waste

Glass.....

.....Plastic

Prohibited Materials are materials that are not allowed in the landfill according to the operational permit specific to each landfill. This could include hazardous waste, construction and demolition debris, or electronic equipment (known as universal waste).

Recyclable is a term used to designate a product or its packaging that can be recycled.*

Recycled is a term used to describe material that has been separated from the waste stream, reprocessed into a new product (often replacing virgin material), and then brought back to the consumer as a new item.*

Recycled-Content is the amount of pre- and post-consumer recovered material introduced as a feedstock in a material production process, usually expressed as a percentage.*

Recycling is a term used to describe a series of activities that includes collecting recyclable materials that would otherwise be considered waste, sorting and processing recyclables into raw materials such as fibers, and manufacturing the raw materials into new products.*

Reuse is a term used to describe a product or item that is used again in the same form and for the same purpose.**

Source Reduction involves the design, manufacture, or use of products and materials to reduce the amount and toxicity of what is thrown away. Practices such as grass cycling (mulch mowing), backyard composting, and two-sided copying of paper are examples of source reduction.*

Telephone Book Recycling is offered when new telephone books are distributed. Residents can include telephone books with their regularly collected commingled recyclables.

Transfer Station is a permanent facility where municipal solid waste is unloaded from collection vehicles and

then subsequently transferred (reloaded) onto larger long-distance transport vehicles for shipment to landfills, recycling facilities, or other treatment or disposal facilities. Transfer stations can provide a more convenient disposal site for customers as well. By combining the loads of several individual collection trucks into a single shipment, communities can save money on labor and transportation costs.**

Universal Waste is waste that has specific requirements for handling and managing, but is exempt from being regulated as hazardous waste. In large quantities, universal waste may be harmful to the environment and therefore shall be managed as hazardous waste after arrival at a destination facility (i.e., landfill, transfer station). Wastes known as "universal wastes" include: batteries, thermostats, fluorescent bulbs, cathode ray tube materials, consumer electronics, aerosol cans, and mercury-containing motor vehicle light switches.

Vermicomposting is the process whereby worms feed on slowly decomposing materials (e.g. vegetable scraps) in a controlled environment to produce a nutrient-rich soil amendment.*

Virgin Product is a term describing a product that is made with 100 percent new raw materials and contains no recycled materials.*

Waste Prevention, also known as source reduction, is any action undertaken by an individual or organization to eliminate or reduce the amount or toxicity of materials before they enter the municipal solid waste stream. This goal may be accomplished through the design, manufacture, acquisition, and reuse of materials. This approach ultimately conserves resources, promotes energy efficiency, and reduces pollution.

Information on Plastic

| CODE | TYPE | NAME | EXAMPLES | DESCRIPTION |
|---|-------|-----------------------------------|---|--|
|  | PETE | Polyethylene Terephthalate | <i>2 liter soda bottles, cooking oil bottles, peanut butter jars</i> | These are the most widely recycled plastics with a California Redemption Value. They are picked up as part of the curbside recycling program. |
|  | HDPE | High Density Polyethylene | <i>detergent bottles, shampoo bottles, milk jugs</i> | These are rigid, narrow-necked containers. They are picked up as part of the curbside recycling program. HDPE grocery bags may be recycled at your local grocery store. |
|  | PVC | Polyvinyl Chloride | <i>plastic pipes, outdoor furniture, water bottles, salad dressing bottles, liquid detergent containers</i> | Hard plastics no. 3 are now accepted in the curbside commingled recycling program in Santa Barbara County, however, plastic pipes are not accepted. Also, containers containing liquid should be rinsed. |
|  | LDPE | Low Density Polyethylene | <i>bread bags, sandwich bags, dry cleaning bags, produce bags, trash can liners, shrink wrap, food storage containers</i> | Hard plastics no. 4 are accepted in the curbside commingled recycling program in Santa Barbara County. Also, plastic film, such as plastic bags, shrink wrap, and saran wrap may now be thrown into a commingled recycling container, if they are clean . In the South County, plastic film may be thrown into the container without being bagged, however, in the North County, the plastic film should be placed in a bag before being dumped in a recycling container. Most major grocery stores will accept certain types of plastic bags to be recycled, and many packaging stores will accept bubble wrap for recycling, if it is clean. |
|  | PP | Polypropylene | <i>aerosol caps, drinking straws, margarine tubs, straws, screw-on lids, wet suits</i> | Hard plastics no. 5 are now accepted in the curbside commingled recycling program in Santa Barbara County. Straws and wet suits, however, may not be placed in commingled recycling containers. Aerosol cans may be placed in commingled recycling containers if they are empty. If contents remain in the aerosol can, then it should be taken to a hazardous waste collection center. |
|  | PS | Polystyrene | <i>styrofoam "peanuts", cups, plastic tableware, meat trays, to-go "clam shells," egg cartons</i> | Hard plastics no. 6 are now accepted in the curbside commingled recycling program in Santa Barbara County. Items made of Styrofoam, however, are still not accepted in Santa Barbara County and are not recyclable. Cups and plates made of hard plastic other than Styrofoam may be placed in commingled recycling containers, if they are clean and free of residue from food and liquids. Also, many packaging stores will accept Styrofoam peanuts for reuse. |
|  | Other | Plastics | <i>various kinds of food containers and Tupperware, ketchup and syrup bottles</i> | Hard plastics no. 7 are now accepted in the curbside commingled recycling program in Santa Barbara County. Food containers must be clean and free of residue. |

Please check the bottom of plastic containers for the appropriate identification number.

Waste Prevention Tips

Santa Barbara County residents throw away more than 400,000 tons of trash each year. Source reduction is another term for waste prevention, a technique to limit the amount of trash that ultimately ends up in landfills. Source reduction seeks to reduce both the volume and toxicity of trash being generated and consumed by focusing on product design, manufacture, and consumption/use. Source reduction can conserve natural resources, save energy, reduce air and water pollution, and help cut waste disposal and handling costs.

The following tips were taken from the United States Environmental Protection Agency's "Consumer Handbook for Reducing Solid Waste":

REDUCE

TIP 1: Reduce the Amount of Packaging

- Avoid buying products with excess packaging;
- When appropriate, use products that you already have on hand to do household chores;
- Consider buying large, economy-sized household items that are used frequently, such as laundry soap, shampoo, dishwashing detergent, pet foods, and cat litter; such sizes usually have less packaging per unit of product. For food items, choose the largest size that can be used before spoiling;
- Whenever possible, buy products such as grocery, hardware, and household items in bulk, concentrated form, or in refillable packages; they often require less packaging and less energy to transport to the store, thereby saving money as well as natural resources;
- Remember that wrenches, screwdrivers, nails, and other hardware are often available in loose bins. At the grocery store, consider whether it is necessary to purchase items such as tomatoes, garlic, and mushrooms in prepackaged containers when they can be bought unpackaged.

TIP 2: Adopt Practices that Reduce Waste Toxicity

- Take actions that use nonhazardous or less hazardous materials to accomplish the task at hand. Instead of using pesticides, for example, use non-toxic methods to control insects and pests; consider using nonhazardous products to complete the same job as products using hazardous components;
- If you do use products containing hazardous materials, use only the amounts needed; donate left-over materials to a business or charity, or share them with neighbors; dispose of used motor oil and

other household hazardous materials at a facility that accepts them for recycling;

- For products containing hazardous components, read and follow all directions on product labels. Make sure the containers are always labeled properly and stored safely;
- Learn about alternatives to household items containing hazardous substances. In some cases, products that you have around the house can be used to do the same job as products with hazardous components. Check with local libraries or bookstores for guidebooks on nonhazardous household practices.

REUSE

TIP 3: Consider Reusable Products

- Consider using sturdy and washable utensils and tableware at home, for picnics, outdoor parties, and potlucks;
- Use washable and reusable cloth napkins, sponges, and dishcloths around the house;
- Purchase items that are in refillable containers (e.g. bottles and jugs for beverages and detergents);
- Whenever possible, use rechargeable batteries; to help reduce trash and keep toxic metals found in some batteries out of the waste stream;
- When using single-use items, take only what is needed (e.g. take only one napkin or ketchup packet if more are not needed).

TIP 4: Maintain and Repair Durable Products

- Research large purchases (e.g. stoves, televisions, cars) in order to determine those products that offer the best energy efficiency, durability, longevity, and repairability;

Photos by MONIE PHOTOGRAPHY

- Maintain and repair appliances and equipment;
- Purchase high quality, long-lasting tires for vehicles and bicycles; to extend tire life, check the tire pressure once a month and rotate tires routinely;
- Mend clothes instead of throwing them away; repair worn shoes, boots, handbags, and briefcases wherever possible;
- Whenever intended for use over a long period of time, choose furniture, luggage, sporting goods, toys, and tools that will stand up to vigorous use;
- Consider using compact fluorescent or LED light bulbs rather than incandescent ones. They last longer, use less energy, and cost less to replace over time.

TIP 5: Reuse Bags, Containers, and Other Items

- Bring your own canvas shopping bag or reuse grocery bags from previous purchases; many stores are happy to offer discounts;
- Bring a reusable cup or mug that can be washed and therefore, reused again and again;
- Pack lunches in a reusable bag with a cloth napkin and reusable drink container;
- Reuse paper and plastic bags, and twist ties; if only one or two items are being purchased, consider not taking a bag;
- Reuse scrap paper and envelopes; make double-sided copies of reports and office memos;
- Save and reuse gift boxes, ribbons, and larger pieces of wrapping and tissue paper;
- Save packaging, colored paper, egg cartons, and other items for reuse or for arts and crafts projects;

- Reuse food packaging (e.g. margarine tubs, coffee cans, water bottles) for storage or craft projects;
- Find other uses or homes for old draperies, bedding, clothing, towels, and cotton diapers; cut up what's left for use as patchwork, rags, doll clothes, rag rugs, or other projects;
- Reuse newspaper, boxes, packaging "peanuts" and bubble wrap to transport or ship packages;
- Turn used lumber into bird houses, mailboxes, compost bins, or other woodworking projects.

TIP 6: Borrow, Rent, or Share Items Used Infrequently

Seldom used items often collect dust, rust, and take up valuable storage space. Borrowing, renting, or sharing such items saves money and natural resources;

- Rent or borrow such items that are used infrequently:
 - Power tools
 - Boats
 - Formal wear
 - Party decorations and supplies such as tables, chairs, centerpieces, linens, dishes, and silverware
 - Audiovisual equipment
 - Ladders, chain saws, buffers, rug cleaners, garden tillers
- Share newspapers and magazines with others or donate them to community groups and nonprofit organizations;
- Before discarding camera equipment, old tools, or other goods, ask friends, relatives, neighbors, or community groups if they can use them.

Photos by MONIE PHOTOGRAPHY

TIP 7: Sell or Donate Goods Instead of Throwing Them Out

- Donate or sell items to thrift stores or other organizations in need;
- Sell secondhand items at fairs, bazaars, swap meets, and garage sales;
- Give used clothing to family members, neighbors, or the needy;
- Consider conducting a food or clothing drive to help others. Where appropriate, encourage area merchants to donate damaged goods or food items that are still edible to food banks, shelters, and other groups that care for the needy.

RECYCLE

TIP 8: Choose Recyclable Products and Containers and Recycle Them

- Purchase products made of materials that are collected for recycling (i.e. metal cans (aluminum, bi-metal, steel, tin), cardboard, glass, mixed paper, newspapers, and plastic containers #1 PETE and #2 HDPE, plastic film (e.g. plastic bags, shrink wrap, bubble wrap) and **hard** plastics #1-#7;
- Take used antifreeze, vehicle batteries, motor oil, paint, stains, solvents, adhesives, aerosols, roof tar, drain openers, pesticides, household cleaners, household batteries, and other types of hazardous waste to facilities that accept them for recycling.

TIP 9: Select Products Made from Recycled Materials

- Purchase products made from recycled content such as bottles, cans, paper wrappings, bags, cereal

boxes, stationery, wrapping paper, and computer paper;

- When checking products for recycled content, look for a statement that recycled materials were used and, if possible, choose the product containing the largest percentage of recycled content.

TIP 10: Compost Yard Trimmings and Some Food Scraps

- Compost yard trimmings and food scraps. If you do not know how to compost, request a copy of the County of Santa Barbara Public Works Department's publication entitled, *The Answer Is Backyard Composting and Yard Waste Reduction* or consult the United States Environmental Protection Agency's website: www.epa.gov/compost;
- If there is no room for a compost pile, offer the materials to community composting programs or garden projects;
- If you have a yard, invest in a lawnmower that leaves grass clippings on the lawn to decompose and return nutrients back to the soil, rather than bagging and disposing of them.

TIP 11: Other Waste Prevention Tips

- Patronize stores and businesses that practice source reduction and other environmentally helpful activities. Call or write letters to those that do not;
- Eliminate junk mail by removing your name from direct mailing lists;
- Cancel unused catalog and magazine subscriptions;
- Circulate publications with a routing slip, and use e-mail rather than making individual copies of memos for everyone in the office.

Waste Prevention Tips Regarding Electronic Equipment

*....Never throw
your electronic
equipment in
the trash.....*

TIP 1: Think carefully about whether or not you really need to buy the latest piece of electronic equipment. Does your current piece of electronic equipment meet your needs? If so, consider keeping your existing equipment.

TIP 2: Consider having your electronic item repaired rather than buying a new one.

TIP 3: If you buy a new computer system, **consider donating** your old computer equipment to a school or nonprofit organization.

TIP 4: If you have an electronic item that runs on batteries, **use rechargeable rather than disposable batteries.**

TIP 5: If you decide that you need and want the most up-to-date electronic products, but you do not want to deal with the end-of-life issue, **consider leasing instead of purchasing new equipment.**

TIP 6: Consider buying equipment from a manufacturer that has a take-back program whereby you may return old equipment for a credit towards the purchase of a new piece of equipment or an upgrade.

TIP 7: Consider purchasing refurbished or remanufactured electronic equipment.

TIP 8: Select products that have reduced toxics content (i.e. reduced lead, mercury, and other heavy metals), greater recycled content, higher energy efficiency, longer life expectancy, can be easily upgraded, and that have features and content that can more easily be recycled.

recycling
needs!*

Directory of Materials for Reuse and Recycling

The following list contains information on companies' locations that will accept used materials for reuse or recycling. Please call ahead to verify information on an entity's operating hours, materials accepted, and/or any restrictions. For a directory of additional places in the City of Santa Barbara that accept a variety of materials for reuse, visit the City of Santa Barbara's website: www.SantaBarbaraCa.gov/SolidWaste/reuse_directory.htm. Please call the number listed on the website for more information on specific services offered.

AEROSOL CANS

See *Hazardous Waste*, pages 74-78.

ALUMINUM

See *list of recycling drop-off and buyback centers* on pages 66-68.

SOUTH COAST

M & M Scrap Metals

(805) 964-9128

(Buyers of aluminum, brass, copper, radiators, stainless steel, steel, and tin.)

MarBorg Industries

119 North Quarantina Street

Santa Barbara, CA 93103

(805) 963-1852

(Scrap aluminum only, no beverage containers.)

MarBorg Industries' Recycling/ ABOP Center

725 Cacique Street (Facility actually on Nopalitos Way.)

Santa Barbara, CA 93103

(805) 963-1852

and

20 David Love Place

Goleta, CA 93117

(805) 964-1498

(Beverage containers only, no scrap aluminum.)

Santa Barbara Iron and Metal Recyclers

709 East Gutierrez Street

Santa Barbara, CA 93103

(805) 966-4468

Fax: (805) 962-1560

(Buyers of CRV cans, glass containers, plastic containers, metal cans [aluminum, steel, tin, bi-metal], brass, copper, cast iron, steel, and tin.)

South Coast Recycling and Transfer Station

(Please see list of public facilities on pages 54-59.)

NORTH COUNTY

Bedford Enterprises

1940 West Betteravia Road

Santa Maria, CA 93455

(805) 922-4977 or (800) 242-8884

(Buyers of scrap aluminum [no beverage containers] and large appliances for recycling.)

City of Lompoc Landfill

(Please see list of public facilities on pages 54-59.)

City of Lompoc Recycling Drop-Off Facility

(Please see list of public facilities on pages 54-59.)

City of Santa Maria Landfill

(Please see list of public facilities on pages 54-59.)

New Cuyama Transfer Station

(Please see list of public facilities on pages 54-59.)

Santa Maria Area Recycling Terminal (SMART) (division of Bedford Enterprises, Inc.)

1940 West Betteravia Road

Santa Maria, CA 93455

(805) 922-4977 or (800) 242-8884

(Buyers of scrap aluminum [no beverage containers] and large appliances for recycling.)

Santa Ynez Valley Recycling and Transfer Station

(Please see list of public facilities on pages 54-59.)

Waste Management

97 Commerce Drive

Buellton, CA 93427

(805) 688-7456

and

1850 West Betteravia Road

Santa Maria, CA 93455

(805) 922-2121

(Accepts scrap metals and metal cans [aluminum, steel, tin, bi-metal] for recycling.)

OUTSIDE SANTA BARBARA**Waste Management, Incorporated
Think Green from Home**

<https://www.thinkgreenfromhome.com/ThinkGreenFromHome.cfm>

(Through this website, Waste Management sells a "single-stream" recycling kit that enables consumers to collect metal cans, cardboard, paperboard, paper, plastic bottles and jugs, and juice and milk cartons for recycling. Shipping is free and consumers receive an e-mail message confirming that the material has been recycled. They also automatically receive a replacement kit box.)

ANTI-FREEZE**SOUTH COAST**

City of Carpinteria's ABOP Center
(Please see list of public facilities on pages 54-59.)

**Community Hazardous Waste
Collection Center**

(Please see list of public facilities on pages 54-59.)

**MarBorg Industries' Recycling/
ABOP Center**

725 Cacique Street (Facility actually on Nopalitos Way.)
Santa Barbara, CA 93103
(805) 963-1852

(This facility is open for households
Monday through Saturday from 8:00 a.m.
to 4:00 p.m.)

and

20 David Love Place
Goleta, CA 93117
(805) 964-1498

(This facility is open for households
Monday through Friday from 9:00 a.m. to
4:00 p.m. and on Saturday from 9:15 a.m.
to 4:00 p.m.)

NORTH COUNTY**City of Lompoc Household
Hazardous Waste Collection Facility**

(Please see list of public facilities on pages 54-59.)

Buellton, CA 93427
(805) 688-7456
and
1850 West Betteravia Road
Santa Maria, CA 93455
(805) 922-2121
(Accepts large and small appliances for
recycling.)

ASBESTOS

See the list of household hazardous waste collection facilities on pages 74-78. Please ensure that you call ahead to receive instructions on the proper handling of asbestos.

ASPHALT

See the firms listed under the Construction and Demolition Debris category on pages 30-31.

BAGS (REUSABLE)

ChicoBag Company

c/o Zero Waste
13434 Browns Valley Drive
Chico, CA 95973
(888) 496-6166
<http://www.chicobag.com/>
E-mail: customerservice@chicobag.com
(Accepts woven reusable bags that will be distributed for use by fixed- or low-income families. Bags that are not reusable are donated to The Grateful Thread, an organization in Pennsylvania that provides support, assistance, and job training to victims of domestic violence. The fabrics and materials from these bags are used to make totes, handbags, aprons, rugs, placemats, and other products. These products are sold by ChicoBag Company and the proceeds are then returned to the Grateful Thread.)

BATTERIES (Household)

Effective July 1, 2011, customers with residential recycling service in the **unincorporated areas** of the County may have household batteries collected curbside for recycling. The household batteries should be placed in a clear plastic bag and placed on top of the household's blue recycling container on collection day. To prevent rechargeable batteries from catching fire, tape the positive ends with clear tape. Customers in apartments and condominiums with centralized trash and recycling service should consult with their property manager to determine the nearest household battery collection location.

Please ensure that you remove the rechargeable battery from a cell phone before taking the cell phone to a location for recycling.

Rechargeable Battery Recycling Corporation (RBRC)

1000 Parkwood Circle, Suite 450
Atlanta, GA 30339
(678) 419-9990
<http://www.call2recycle.org/>
The RBRC recycles cell phones and rechargeable batteries found in cordless electronic products such as: power tools, laptop computers, digital cameras, two-way radios, camcorders, cell and cordless phones, and remote control toys. It recycles the following types of **rechargeable batteries**: nickel cadmium; nickel metal hydride; nickel zinc; lithium ion; and small, sealed lead batteries, weighing less than 11 pounds. Alkaline, lithium, and non-rechargeable batteries are not accepted for recycling.

Digital or analog **cell phones** with or without the battery or charger, of any make or model, are accepted for recycling. RBRC does **not** accept household cordless phones, mobile installed or bag phones, two-way radios, walkie-talkies, or pagers for recycling. The cell phones are recycled or refurbished and resold, when possible, with a portion of the proceeds going to select charities.

The following retailers accept both rechargeable batteries and cell phones for recycling: Black and Decker, Circuit City, The Home Depot, Lowes, Office Depot, RadioShack, Sears, and Target.

To identify a location nearest you, call (877) 273-2925 (drop-off locator); (877) 723-1297 (customer service); or visit www.call2recycle.org.

Unless otherwise noted, the following places accept used household batteries (rechargeable and non-rechargeable) FOR FREE for recycling:

SOUTH COAST

Best Buy
7090 Marketplace
Goleta, CA 93117-5902
(805) 571-3999
(Rechargeable batteries only.)

Buena Tool Company
433 Laguna Street
Santa Barbara, CA 93101
(805) 963-3885
(Rechargeable batteries only.)

CVS Pharmacy
1036 Casitas Pass Road
Carpinteria, CA 93013
(805) 684-2784
and
189 South Turnpike Road
Goleta, CA 93111
(805) 967-4525

Effective Since July 1, 2006

Any retailer (includes sales through outlets, catalogs, and the Internet) in California that sells rechargeable batteries to consumers has been required to establish a system to accept and collect used rechargeable batteries for reuse, recycling, or proper disposal at NO COST to the consumer. The batteries must be of a type or brand that the retailer sold or previously sold.

and
5875 Calle Real
Goleta, CA 93117
(805) 964-6991
(Rechargeable batteries only.)
and
1282 Coast Village Road
Santa Barbara, CA 93108
(805) 565-0806
and
1835 Cliff Drive
Santa Barbara, CA 93109
(805) 962-7506
and
222 West Carrillo Street
Santa Barbara, CA 93101
(805) 965-9632
and
1109 State Street
Santa Barbara, CA 93101
(805) 564-0079
(Rechargeable batteries only.)

BOOKS

Unless otherwise noted, the places below do not accept textbooks, encyclopedias, or Reader's Digest condensed books. The books must be in good condition and not contain any marks or mold. Generally, used textbooks are not recyclable due to the glue that is used in the binding. Rather than throw the used textbooks away, school districts and individual schools should explore resources that will reuse them.

The following resources offer the option of accepting used textbooks to be reused:

Books for Africa

253 East 4th Street (office address)

St. Paul, MN 55101

715 East Minnehaha Avenue E

(warehouse)

St. Paul, MN 55130

(651) 602-9844 or

2971 Olympic Industrial Drive, SE

Suite B (warehouse)

Smyrna, GA 30080

www.booksforafrica.org/index.html

E-mail: bfa@booksforafrica.org

This nonprofit organization collects, sorts, ships, and distributes new and used books from primary through post-secondary levels

to children in Africa. The cost of shipping books and their fair market value is tax deductible, however, BFA will not assign a dollar value.

The books should be in good condition, 10 years or less old (except for encyclopedias and dictionaries, which may be 15 years or less old), and contain content relevant to Africans.

Books for the Barrios

2350 Whitman Road, Suite D
Concord, CA 94518
(925) 687-7701

<http://booksforthebarrios.org/home.php>

E-mail: info@booksforthebarrios.com

(This agency collects donated children's books, toys, and consumable educational materials (e.g. crayons, markers, pens, pencils, glue, etc.) in the United States and ships them to poor, remote schools in the Philippines.)

CalMAX

The California Materials Exchange

(CALMAX) portal assists businesses, organizations, manufacturers, schools, and individuals by providing links to various on-line resources for exchanging materials. These on-line resources provide information on markets for non-hazardous materials that have traditionally been discarded. Visit: <http://www.calrecycle.ca.gov/calmax/>

Follett Educational Services

1433 Internationale Parkway
Woodridge, IL 60517-4941
(800) 621-4272

www.fes.follett.com/sell_textbooks/sell_used_textbooks.cfm

E-mail: sellbooks@fes.follett.com

(This company buys and sells used textbooks 10 years old or less geared towards primary and secondary grade levels.

Independent Book Buying Services, LLC

4353 Rowland Avenue
El Monte, CA 91731
(800) 598-2275

(626) 278-6388 (cell phone)

<http://ibbstextbooks.net/>

E-mail: info@ibbstextbooks.net

(Pays for used textbooks from colleges/universities and grades K-12. The firm will also pick up for free obsolete textbooks that a school or district may have.)

Operation Paperback

(214) 602-1726

<http://www.operationpaperback.org/>

E-mail:

information@operationpaperback.org
(Accepts monetary donations or asks people to become "voluntary shippers" to send books, magazines, CDs, and DVDs directly to military personnel overseas. Guidelines and shipping information on website.)

PrisonPenPals.com

<http://prisonpenpals.com/booksbehind-bars.html>

(This website lists prisons across the United States that need different types of books for the inmate population. Each prison listed provides information on the following:

- Whether or not books can be dropped off;
- Types of books and materials needed;
- Where to send books; and
- Contact information.)

To see a listing of other organizations that accept used textbooks, please

visit the California Department of Resources Recycling and Recovery (CalRecycle) website:

<http://www.calrecycle.ca.gov/Reduce/Waste/Schools/usedtext.htm>

The following on-line resources offer people a way to exchange and trade books for free:

BookMooch

<http://bookmooch.com/>

This on-line community allows people to exchange used books. Every time a member gives another member a book, he/she earns a point that will in turn allow that member to request a book from any other BookMooch member. After reading a book, a member may keep the book or make it available for another member to read. There is no cost to join or use the website. The only cost involved is mailing books to other members.

PaperBackSwap

www.paperbackswap.com/index.php

This on-line national club allows its members to share paperback, hardcover, and audio books with other members. Each member lists books she/he is willing to mail upon request. When a book is received, the sender receives one credit, which he/she can use to order a book from another member. Also, a member may keep a book if desired. The only cost involved is the shipping of a book.

Oroville, CA 95965
(530) 533-3567
<http://cleanflame.com/>
(Company purchases baled and flattened wax corrugated cardboard from various businesses such as grocery stores, hardware stores, restaurants, distributors, and farmers/growers. In exchange, the stores agree to sell the company's fire logs and fire starters made from this material.)

Waste Management, Incorporated Think Green from Home

<https://www.thinkgreenfromhome.com/ThinkGreenFromHome.cfm>

Waste Management sells a "single-stream" recycling kit that enables consumers to collect metal cans, cardboard, paperboard, paper, plastic bottles and jugs, and juice and milk cartons for recycling. Shipping is free and consumers receive an e-mail message confirming that the material has been recycled. They also automatically receive a replacement kit (box).

CARPETING

Under Assembly bill 2398, from July 1, 2011 through the end of 2016, manufacturers are required to add an assessment of \$.05 per square yard to the purchase price of all carpet sold in California. This fee is to be identified on the consumer's invoice. The Carpet America Recovery Effort (CARE) serves as the carpet stewardship organization. It receives and administers the funds and will provide incentive payments to certified carpet recycling processors approved by the state.

For a list of carpet and carpet pad recycling facilities in California that businesses and other organizations may use, visit CalRecycle's website: <http://www.calrecycle.ca.gov/condemo/Carpet/Facilities.htm>

SOUTH COAST

MarBorg Industries

119 North Quarantina Street
Santa Barbara, CA 93103
(805) 963-1852
(Used carpeting may be accepted from households and businesses depending on market conditions. Call ahead to confirm that carpeting will be accepted. Facility is open Monday through Friday from 7:00 a.m. to 5:00 p.m. and Saturday from 7:00 a.m. to 4:00 p.m.)

OUTSIDE SANTA BARBARA COUNTY

Interface Global

Under the Interface ReEntry Program, carpet tile in good condition and from Interface Flooring Systems or Bentley is cleaned and donated to a community charity. All other approved vinyl-backed tile is returned to Interface Flooring System's facility in LaGrange, Georgia for sorting. The nylon is recaptured through shearing and sent to the Ford Motor Company, while the backing is ground up and made into new backing.

Broadloom carpet is reclaimed and sent to one of several recycling facilities to be chopped and baled, processed, and then converted into raw material for manufacturing into vehicle parts, carpet padding and industrial matting, or converted into energy, if no other options are available. For information on this program, visit: http://www.interfaceservices.com/assets/SERVICES_BRO_V4.pdf or call (800) 336-0225, ext. 4490.

Los Angeles Fiber Company

5190 Santa Fe Avenue
Vernon, CA 90058
(323) 589-5637
Fax: (323) 588-0424
<http://www.lafiber.com/>
E-mail: salesmanager@lafiber.com
(This company accepts carpeting material from organizations of any fiber type or construction and from any manufacturer to be recycled into fiber and carpet cushions, plastic compounders, and felt pads.)

Shaw Green Edge

Through its Evergreen Nylon Recycling facility in Augusta, Georgia, Shaw recycles Nylon 6 carpets that it has collected from various locations throughout the United States to produce new carpeting. For more information, call (800) 434-9887 or visit their website: <http://www.shawfloors.com/About-Shaw/Carpet-Recycling>

Tandus

311 Smith Industrial Boulevard
P.O. Box 1447
Dalton, Georgia 30722
(800) 248-2878
Through a program called Infinity Initiative, this firm collects used carpeting from businesses to be recycled. For more information, visit: <http://www.tandus.com/content/environmental-responsibility>

(Select post offices will provide free postage paid envelopes to allow consumers to mail back used inkjet cartridges, personal digital assistants (PDAs), cell phones, digital cameras, MP3 players, and other small electronics to be reused or recycled. If the electronic item or cartridges cannot be refurbished or resold, its component parts are reused to refurbish other items, or the parts are broken down further and recycled. To obtain these envelopes, visit your nearest postal office.)

CAST IRON

See the firms listed under the Construction and Demolition Debris category on pages 30-31.

.....
Effective Since July 1, 2006

Retailers (includes sales through outlets, catalogs, and the Internet) must have and promote a system for accepting and collecting used cellular phones for reuse, recycling, or proper disposal.

At no cost to the consumer, the retailer must accept from a consumer a used cellular phone, whether or not the consumer purchased the phone from the retailer.

CELL PHONES

Check your local telephone directory or on-line telephone directory to find the nearest retailer where you may return your used cellular phone to be recycled. You may also send or drop off your used cell phone at one of the following locations to be recycled:

Rechargeable Battery Recycling Corporation (RBRC) Call2Recycle
 1000 Parkwood Circle, Suite 450
 Atlanta, GA 30339
 (877) 723-1297

The RBRC collects and recycles cell phones and the following types of **rechargeable batteries**: nickel cadmium; nickel metal hydride; nickel zinc; lithium ion; and small, sealed lead batteries, weighing up to 11 pounds/5 kg. Non-rechargeable batteries are **not** accepted for recycling.

Digital or analog **cell phones** with or without the battery or charger, of any make or model, are accepted for recycling. RBRC does **not** accept household cordless phones, mobile installed or bag phones, two-way radios, walkie-talkies, or pagers for recycling.

The cell phones are recycled or refurbished and resold, when possible, with a portion of the proceeds going to select charities. The following retailers accept for free both rechargeable batteries and cell phones for recycling: Black and Decker, Circuit City,

The Home Depot, Lowes, Office Depot, RadioShack, Sears, and Target. To identify a location nearest you, enter your zip code on the website, www.call2recycle.org.

Recellular, Incorporated

2300 Traverwood Drive
 Ann Arbor, MI 48105
 (800) 441-1544 or (734) 205-2200
 Fax: (800) 648-6785 or (734) 205-2155
<http://www.securetradein.com/home/howdoesitwork.aspx>
 E-Mail: customerservice@recellular.com
 Recellular, Incorporated buys, sells, and recycles used cell phones. Through the Secure Trade-in program, Recellular pays for cell phones that can be reused, while it recycles those cell phones deemed obsolete. Through this website, a consumer identifies his/her cell phone, describes the phone's condition, and then mails the cell phone, using a prepaid mailing label. Upon receipt of the cell phone and confirmation of its condition, Recellular will send a check to the consumer for its value. Recellular will accept any hand-carried (not vehicle installed) cell phone, as well as batteries and chargers, if available. Mobile-installed telephones, two way radios, walkie-talkies, and cordless phones for home use are **not** accepted.

United States Postal Service

<http://about.usps.com/what-we-are-doing/green/recycle.htm>
 (Select post offices will provide free postage paid envelopes to allow consumers to mail back used inkjet cartridges, personal digital assistants (PDAs), cell phones, digital cameras, MP3 players, and other small electronics to be reused or recycled. Waste Management, Incorporated Think Green from Home

<https://www.thinkgreenfromhome.com/ThinkGreenFromHome.cfm/>

Through this website, consumers may purchase separate kits to collect fluorescent tubes and light bulbs, household batteries, sharps, and electronics to be recycled. Shipping is free and consumers receive an e-mail message confirming that the material has been recycled. They also automatically receive a replacement kit (box).

Walmart

Electronics Trade-In Program

<http://walmart.gazelle.com/>

Walmart offers a program to its members for the trade-in or recycling of the following types of used electronics: computers and peripherals, cell phones and PDAs, audio and video equipment, digital cameras, camcorders, game systems, and MP3 players. Consumers may use an on-line calculator to determine the trade-in value of their electronic equipment. Once the items have been shipped for free via United Parcel Service, and following confirmation from the electronics processor, the consumer will receive a Walmart cash card for the determined value of the items. If the electronic items have no trade-in value, then a consumer may still ship their used electronic items for free to be recycled.

DRYWALL

See the firms listed under the Construction and Demolition Debris category on pages 30-31.

ELECTRONIC EQUIPMENT

Electronic waste or e-waste for short, is comprised of various types of computer, office, audio, and video equipment, including such items as the following:

- computers
- computer monitors
- laptop computers
- copiers
- fax machines
- scanners
- compact disk and digital video disk players
- audio video cassette recorders

These items contain toxic materials such as lead, cadmium, mercury, hexavalent chromium, PVC plastics, and brominated flame retardants and should never be thrown into the trash. When disposed of in a landfill, these materials can contaminate the soil and groundwater.

In an effort to begin addressing this issue, in January 2005, California became the first state in the nation to establish a funding system for the collection and recycling of certain types of e-waste. A fee is charged at the point of sale, including Internet and catalog sales, on electronic devices containing a cathode ray tube (CRT) or liquid crystal

display, i.e. computer monitors, laptop computers, televisions, and portable DVD players that have a video display screen of more than four inches measured diagonally.

Effective on January 1, 2013, the following new fees will be applied to purchases of such electronic devices with video display screens: The amount of the fee is dependent on the size of the screen measured diagonally:

- \$3.00 when the screen is less than 15 inches;
- \$4.00 when the screen is at least 15 inches, but smaller than 35 inches;
- \$5.00 when the screen is 35 inches or larger.

In February 2006, the California Department of Toxic Substances Control (DTSC) banned the disposal of additional types of e-waste (electronics that do not contain cathode ray tubes), such as printers, VCRs, cell phones, microwave ovens, and radios. Also included in the ban were household batteries, fluorescent lights, and mercury-containing equipment, such as thermometers and gauges.

Use the available resources below for collecting your electronic equipment to be repaired and reused or recycled.

Ventucopa Transfer Station

(Please see list of public facilities on pages 54-59.)

Vocational Training Center (VTC) Enterprises Thrift Store

(Lompoc and Santa Maria stores.)
(Please see list of thrift stores on pages 62-65.)

Waste Management

97 Commerce Drive
Buellton, CA 93427
(805) 688-7456

and

1850 West Betteravia Road
Santa Maria, CA 93455
(805) 922-2121

(Accepts a wide variety of electronic [i.e. computer, office, audio and video] equipment, and small appliances such as toasters, toaster ovens, vacuums, hair dryers, etc. from households and businesses for recycling. There is a per pound charge per item.)

The following local program accepts computers and computer monitors for reuse:**Santa Barbara County Education Office****Computers for Families**

4400 Cathedral Oaks Road
P.O. Box 6307
Santa Barbara, CA 93160-6307
(805) 964-4711 ext. 5400

<http://www.sbceo.org/~sbceooff/>

(Accepts donations from households and businesses of desktop and laptop computers; color computer monitors; and peripherals such as mice, keyboards, and modems and flash drives. Computers are refurbished by local businesses, organizations, individuals and by students at the Los Prietos Boys Camp. Students in the 4th through 6th grades without a computer are identified for receipt of a computer. Before taking a computer home, students and their families receive an orientation that includes information on the Internet, and training on the software programs in their computers.)

GREENSPOT DROPOFF, INC. LOCATIONS**Greenspot Dropoff, Inc.**

4712 West Magnolia Boulevard
Burbank, CA 91505
(800) 350-3550

<http://www.greenspotdropoff.org>

E-mail: info@greenspotdropoff.org
(This company has partnered with businesses and recyclers to offer locations for households and businesses to drop off their electronic equipment for free. In dropping off the electronic equipment, the consumer/business must complete a collector log by providing a name or name of business, address, city, state, zip code, phone number, e-mail address, and the number and types of electronic equipment being dropped off. Alternatively, businesses may arrange to have their electronic equipment picked up for a fee, after providing this information on a form. The company will then provide the business with a price quotation.)

The company accepts all types of computer, office, audio, and video equipment. Also, printer cartridges and cell phones are accepted separately. No appliances are accepted.)

OUTSIDE SANTA BARBARA COUNTY**Community Union**

7555 Van Nuys Boulevard
Van Nuys, CA 91405
(818) 781-8170

For donations call (877) 776-7274 or send an e-mail message to:

CUInc@CommunityUnion.org

www.CommunityUnion.org

(Accepts donations of computer equipment (no Macintosh equipment), repairs or upgrades the equipment, and then donates the equipment to students who have completed a computer education course)

on various software programs; advanced students are taught how to repair and upgrade computers.)

Direct Fix

358 Digital Drive
Morgan Hill, CA 95037-2879
(877) 810-9747 (billing questions only)
(408) 778-4577 fax
http://www.directfix.com/mm5/merchant.mvc?Screen=SFNT&Store_Code=GHT
E-mail: customerservice@directfix.com
(Sells parts and accessories for I-Phones, I-Pods, Blackberry, PDAs, and hand held game units to enable consumers to repair these devices themselves. All communication and technical support provided through e-mail.)

e-Bay, the world's largest online marketplace, and **Earth 911** have joined together to establish a Rethink initiative that is designed to educate the public about the different options for safely disposing of electronics, including donation, reuse, recycling, and refurbishing. Visitors to eBay's Rethink site, www.ebay.com/rethink, will be able to easily access Earth 911's database of community resources on local electronics collection programs.

Earth 911 is an online database of community specific resources on recycling, conservation, and pollution prevention.

EnviroSmart

600 Montour Drive
Richmond, Virginia 23236
(804) 272-3281 (also fax number)
www.envirosmart.org
E-mail: Bob@EnviroSmart.org
(Accepts toner and ink cartridges and cell phones free of charge from households or businesses, and provides the collection materials and pays for shipping charges. Once the donations total over \$20.00, then Enviro Smart will submit a check payable to the organization or individual that is designated.)

GreenDisk

2200 Burlington
Columbia, MO 65202
(800) 305-3475
www.greendisk.com
E-mail: info@greendisk.com
(Accepts the following from households and businesses for recycling: cell phones, pagers, personal digital assistants (PDAs) and their chargers, cables and headset accessories, and small electronic devices [e.g. MP3 players, digital cameras, hand-held scanners, hand-held games, and computer cords, cables, chips]. The firm also accepts desktop and laptop computers, CPUs, monitors 17" or less, keyboards, mice, printers, fax machines, and scanners.)

Recycled Goods.com

3820 North Ventura Avenue
Ventura, CA 93001
(805) 648-3300, ext. 0
Fax: (805) 648-3350
<http://www.recycledgoods.com>
(Offers services pertaining to used dental, electronic, medical, office, and scientific equipment. Firm will purchase used equipment, offer the used equipment at an auction, sell the used equipment and share the revenue, manage trade-in and lease returns, provide assistance in locating hard to find equipment, and recycle used equipment.)

Technology Training Foundation of America

8825 Production Avenue
San Diego, CA 92121
(858) 547-3992
Fax: (858) 547-7559
www.computers2learnby.org
(Accepts donations of desktop and laptop computers, monitors, keyboards, mice, processors, hard drives, network cards, modems, memory modules, and routers/switches/network equipment. The equipment is sent to a refurbishment center and then donated to schools and nonprofit organizations. Donations of working office, audio, and video equipment are also accepted. Computer equipment that cannot be repaired or upgraded is recycled. Call or check the website to determine specific donation criteria.)

United States Postal Service

<http://about.usps.com/what-we-are-doing/green/recycle.htm>
(Select post offices will provide free postage paid envelopes to allow consumers to mail back used inkjet cartridges, personal digital assistants [PDAs], cell phones, digital cameras, MP3 players, and other small electronics to be reused or recycled. If the electronic item or cartridges cannot be refurbished or resold, its component parts are reused to refurbish other items, or the parts are broken down further and recycled. To obtain these envelopes, visit your nearest postal office.)

Waste Management, Incorporated Think Green from Home

<https://www.thinkgreenfromhome.com/ThinkGreenFromHome.cfm>
Through this website, consumers may purchase separate kits to collect fluorescent tubes and light bulbs, household batteries, sharps, and electronics, as well as small appliances to be recycled. Shipping is free and consumers receive an e-mail message confirming that the material has been recycled. They also automatically receive a replacement kit (box).

TAKE-BACK PROGRAMS OF MANUFACTURERS AND RETAILERS

To learn about the take-back programs of manufacturers and retailers of electronic equipment, please visit the website of the Electronics Take Back Coalition:

<http://www.electronicstakeback.com/how-to-recycle-electronics/manufacturer-takeback-programs/>

For information on take back programs of other manufacturers and retailers, visit these websites:

Best Buy

www.bestbuy.com/recycling
Consumers may bring up to three electronic items per day, per household, for recycling at any Best Buy store in the United States.

This program supplements Best Buy's existing recycling programs:

- Recycling kiosks just inside the front door of every store where consumers may drop-off ink cartridges, rechargeable batteries, cell phones, CDs, DVDs, and PDAs/smart phones for free recycling;
- Appliance and television haul away whereby Best Buy will pick-up an old or obsolete appliance or television for free from a consumer's home when a new product is purchased and delivered by Best Buy Home Delivery or Geek Squad Home Theater Installation Service;

- Tech Trade-in: visit www.bestbuytradein.com to trade in select lightly used electronics for a Best Buy gift card. For more information, please call (877) 310-4227.

Canon

<http://estore.usa.canon.com/recycle/recycle.asp>

Circuit City

Through its website, <http://circuitcity.cexchange.com/online/home/index.rails> Circuit City offers its customers a trade-in program through Consumer Electronics Exchange (CEExchange) for used computers, LCD monitors, digital cameras, camcorders, MP3 players, video games, vehicular audio and amplifying equipment, GPS navigators, radar detectors, and cell phones. A customer can use a prepaid shipping label to send its items to CEExchange and will receive a check within two to four weeks of receipt of the items.

Epson

<http://www.epson.com/cgi-bin/Store/Recycle/RecycleProgram.jsp>

RadioShack

RadioShack offers a trade-in program for a variety of electronics.

<http://radioshack.cexchange.com/online/home/index.rails>

or e-mail customer service:

customerservice@cexchange.com

Mailing address: 4500 Ratliff Lane, Suite 108, Addison, TX 75001

Sears

<http://sears.cebuyback.com/>

Through a partnership with Clover Technologies Group, Sears offers a program to its customers for the trade-in or recycling of various types of used electronics, including cell phones, laptop computers, cameras and lens, camcorders, MP3 players, game systems, video games, DVDs, CDs, tablets and e-readers. Once the items have been shipped for free and following confirmation from the electronics processor, the consumer will receive a Sears cash card for the determined value of the items. The card can be redeemed on-line or at any Sears or K-Mart store. If the electronic items have no trade-in value, then a consumer may still ship their used electronic items for free to be recycled.

Walmart**Electronics Trade-In Program**

<http://walmart.gazelle.com/>

Walmart offers a program to its members for the trade-in or recycling of the following types of used electronics: computers and peripherals, cell phones and PDAs, audio and video equipment, digital cameras, camcorders, game systems, and MP3 players. Consumers may use an on-line calculator to determine the trade-in value of their electronic equipment. Once the items have been shipped for free via United Parcel Service, and following confirmation from the electronics processor, the consumer will receive a Walmart cash card for the determined value of the items. If the electronic items have no trade-in value, then a consumer may still ship their used electronic items for free to be recycled.

In addition, working with the National Cristina Foundation, consumers and businesses can donate any working computer system to schools and community groups.

EYEGLASSES

Lions Clubs across the country collect eyeglasses from thousands of opticians and optometrists. The eyeglasses are repaired as needed and then donated to residents in other countries. Check with your local optician or optometrist to confirm that they participate in this program. In addition, eyeglasses may be dropped off at the following locations:

SOUTH COAST**Direct Relief International**

(Buyer of flooring for recycling.)

Santa Ynez Valley Recycling and Transfer Station

(Please see list of public facilities on pages 54-59.)

FLUORESCENT LIGHT BULBS / TUBES

Please note that in California, fluorescent lights may not be thrown into the trash, since they contain a small amount of mercury.

Should a fluorescent light break, please follow the recommended actions below regarding clean-up and disposal:

BEFORE CLEAN-UP: Air Out the Room

- Have people and pets leave the room, and don't let anyone walk through the breakage area on their way out.
- Open a window and leave the room for 15 minutes or more.
- Shut off the central forced-air heating/air conditioning system, if you have one.

CLEAN-UP STEPS: for Hard Surfaces

- Carefully scoop up glass pieces and powder using stiff paper or cardboard and place them in a glass jar with metal lid (such as a canning jar) or in a sealed plastic bag.
- Use sticky tape, such as duct tape, to pick up any remaining small glass fragments and powder.
- Wipe the area clean with damp paper towels or disposable wet wipes. Place towels in the glass jar or plastic bag.
- Do not use a vacuum or broom to clean up the broken bulb on hard surfaces.

CLEAN-UP STEPS: for Carpeting or Rug

- Carefully pick up glass fragments and place them in a glass jar with metal lid (such as a canning jar) or in a sealed plastic bag.
- Use sticky tape, such as duct tape, to pick up any remaining small glass fragments and powder.
- If vacuuming is needed after all visible materials are removed, vacuum the area where the bulb was broken.
- Remove the vacuum bag (or empty and wipe the canister), and put the bag or vacuum debris in a sealed plastic bag.

CLEAN-UP STEPS: for Clothing, Bedding and Other Soft Materials

- If clothing or bedding materials come in direct contact with broken glass or mercury-containing powder from inside the bulb that may stick to the fabric, the clothing or bedding should be thrown away. Do not wash such clothing or bedding because mercury fragments in the clothing may contaminate the machine and/or pollute sewage.
- You can, however, wash clothing or other materials that have been exposed to the mercury vapor from a broken Compact Fluorescent Light (CFL), such as the clothing you are wearing when you cleaned up the broken CFL, as long as that clothing has not come into direct contact with the materials from the broken bulb.
- If shoes come into direct contact with broken glass or mercury containing powder from the bulb, wipe them off with damp paper towels or disposable wet wipes. Place the towels or wipes in a glass jar or plastic bag for disposal.

DISPOSAL OF: Clean-up Materials

- Immediately place all clean-up materials outdoors in a trash container or protected area for the next normal trash pickup.
- Wash your hands after disposing of the jars or plastic bags containing clean-up materials.
- In Santa Barbara County, you may take these materials to the hazardous waste facilities in Santa Barbara, Lompoc, or Santa Maria.

FUTURE CLEANING OF CARPETING OR RUG: Air Out the Room During and After Vacuuming

- The next several times you vacuum, shut off the central forced-air heating /air conditioning system and open a window before vacuuming.
- Keep the central heating/air conditioning system shut off and the window open for at least 15 minutes after vacuuming is completed.

In addition to using compact fluorescent lights, consumers use other products that contain mercury. In the event any of these products break, there are certain steps that should be taken in terms of clean-up and disposal. In addition to providing information on the do's and don'ts if a fluorescent light bulb or thermometer containing mercury breaks, the United States Environmental Protection Agency (USEPA) has a website that provides information on storing, transporting, and disposing of mercury:

<http://www.epa.gov/mercury/spills/index.htm>

Use the available resources below for the disposal of your used fluorescent lights.

(510) 383-1983 or (888) 588-9490

www.thereusepeople.org

E-mail: info@TheReusePeople.org

(Salvages building materials and distributes them for reuse throughout California. Offers a variety of services to private building owners, contractors, developers and government agencies including: deconstruction [demolition], materials salvage, materials reuse and recycling plans, and reuse and recycling consultant services such as business planning, feasibility studies, pilot projects, and retail store planning and management.

In the United States, TRP ships building materials to one of its warehouses or to a partnering agency for sale and distribution to the public. Some materials are used by furniture, cabinet, and flooring manufacturers, while large pieces of lumber are shipped to mills that resurface and cut the lumber for reuse in homes and commercial buildings. Private building owners are eligible for tax donations, which can be substantial and may even cover the costs of deconstruction.

For information on deconstruction services in southern California, please call (310) 946-3179.

OUTSIDE SANTA BARBARA COUNTY

California Materials Exchange

(CALMAX) The California Materials Exchange (CALMAX) portal assists businesses, organizations, manufacturers, schools, and individuals by providing links to various on-line resources for exchanging materials. These on-line resources provide information on markets for non-hazardous materials that have traditionally been discarded. Visit: <http://www.calrecycle.ca.gov/calmax/>

Craigslist

www.craigslist.org

(Craigslist is an on-line listing of local classified ads and forums that encompasses over

500 cities and 50 countries. Except for the posting of job advertisements in 10 cities and brokered apartment listings in New York City, ads placed on Craigslist are free.)

E-Bay

<http://pulse.ebay.com/>

(E-Bay is an on-line forum for the buying and selling of items on a local, national, and international basis.)

Earth911.com

1375 North Scottsdale Road, Suite 140
Scottsdale, AZ 85254
(480) 889-2650

<http://earth911.com/>

(This website provides comprehensive information on how and where materials in the following categories may be recycled: paper, metal, plastic, glass, hazardous waste, electronics, automotive, household, garden, and construction. Earth911 strives to encourage consumers and businesses to reduce, reuse, and recycle. The company maintains a bilingual hotline, 1-800-CLEANUP, which people can call to find the nearest location to recycle particular materials. Earth911.com for Businesses provides basic explanations of how a business can benefit by adopting the reduce, reuse, recycle philosophy. Guides are also offered to assist businesses in the following areas: conducting a waste assessment, workplace recycling, green purchasing, conserving energy, reducing waste, conserving water, reusing materials, and reducing the use of products.)

Ecofreek

(510) 962-4385

<http://www.ecofreek.com/>

E-mail: info@ecofreek.com

(This search engine examines over 45 websites that offer free and for swap items that people no longer need or want. It then provides the results free to the visitor based on the search criteria [e.g. item in city and state].)

Freecycle

P.O. Box 294

Tucson, AZ 85702

www.freecycle.org

E-mail: info@freecycle.org

(This on-line membership network enables people to give and receive materials for free to encourage people to reuse those materials. Members of a local group place ads over the Internet for materials that they want to give away or to receive. Membership is free and ads must be free, legal, and appropriate for people of all ages. Each local group generally has two to six local volunteer moderators who help coordinate its efforts. There are an additional 20 to 30 volunteer moderators who help existing groups with outreach and provide assis-

tance in addressing day-to-day problems.

Another two or three volunteers address questions sent to info@freecycle.org. Four to five volunteers lead the worldwide moderator group and there are leaders for each of the teams. Freecycle is a non-profit organization based in Tucson, Arizona.)

Hi-Cone Ringleader Program

1140 West Bryn Mawr Avenue
Itaska, IL 60143

(630) 438-5300 or (800) 965-7464

www.ringleader.com

E-mail: itw@ringleader.com

(Encourages schools and other groups to join the Ring Leader Recycling Program. Enrollees are sent a kit that includes mailing labels and a tree for collecting the six-pack rings and plastic multi-pack carriers for recycling.)

Junk Recyclers

(800) GOT-JUNK or (818) 754-1231

www.1800gotjunk.com

(Has franchises throughout the United States, Canada, United Kingdom, and Australia and will pick up all types of materials [e.g. large and small appliances, books, bicycles, carpeting, construction and demolition debris, electronics, flooring, furniture, household goods, home improvement supplies, mattresses, medical equipment, wood and yard waste, etc.] from households and businesses. A crew arrives generally within one to two days of receipt of the request. Upon arrival, the crew examines the material to be picked up and provides the requesting party a cost figure based on the volume of material picked up and not the amount of time it takes to load the material into a truck. The requesting party then decides whether or not to have the material picked up; items cannot be heavier than what two people can lift. Every effort is made to recycle or donate the material that is picked up.)

Local Reuse

3439 NE Sandy Boulevard, #283

Portland, OR 97232

(877) 244-4648

<http://www.localreuse.org>

This on-line reuse exchange service is free and has a geographically-based listings search filter that is tied to a specific radius from a designated zip code. It also allows a user to designate other Gigoit users as "neighbors" for easy referencing and linking. In addition, it supports using RSS (real simple syndication) to provide streaming updates on new listings. Finally, it allows users to link their Facebook page, as well as various Google tools [e.g. Google Earth] to Gigoit data.)

Mesh

<http://meshing.it/>

Mesh is an on-line directory of companies that offer goods and services in a variety of categories. Businesses in Mesh's directory create, share and use social media, wireless networks, and data to provide people with goods and services at a cost or for free. The goal is to provide consumers with more choices, tools, and information. Companies can make money while strengthening their brand and helping customers buy less but use more.

RecycleMatch

3375 Westpark Drive, Suite 321

Houston, TX 77005

(713) 581-0466

www.recyclematch.com

E-mail: info@recyclematch.com

(Owners of materials list their waste and recyclable commodities on the website and include the location, descriptions, and a suggested price for the material. Bidders can look at the information and decide how much they want to offer. The site uses a closed bidder system whereby bidders can see how their price ranks in relation to other bids but cannot see the other bids. Bidders and sellers do not learn about the other party until the transaction is complete. Once the auction closes, the seller can choose the winning bid, and it does not have to be based on price.)

Swap.com

500 Harrison Avenue, 3rd Floor

Boston, MA 02118

<http://www.swap.com/>

Through this website, people can list items that they have and items they want for free in the categories of books, CDs, DVDs, and video games and trade for items in these categories that they would like. In another section of the website, visitors can browse items in the categories of art, baby/kids, books, collectibles, computers and electronics, coupons, health and beauty, home and garden, jewelry and watches, men's and women's fashion, motors, movies, music, sports and outdoors, tickets, toys and hobbies, and wedding. The only cost involved is the mailing.

TerraCycle

121 New York Avenue

Trenton, NJ 08638

(609) 393-4252

www.terracycle.net

E-mail: customersupport@terracycle.net
(This organization partners with businesses, schools, and organizations who join a "brigade" to collect their used containers and packaging for recycling. Among the products it collects are the following: yogurt containers, energy bar wrappers, drink pouches, Bear Naked bags, aluminum cans,

plastic soda bottles, corks, cookie wrappers, chip bags, toasted chip bags, coffee bags, writing instruments, inkjet cartridges, laptop computers, cell phones, and Mars' food, drink, candy, gum, and dog food products. Depending on the number of containers or items collected in a particular category, Terra Cycle will donate a portion of the proceeds to the collector's favorite charitable organization or school. The materials collected will be made into new products.)

Throwplace.com

<http://www.throwplace.com/>

E-mail: info@throwplace.com

(for information) or

help@throwplace.com

(for customer service)

(This on-line reuse exchange service is free and enables the user to register as an individual, business, or charity. The user completes a form and designates the section to be listed in: charity, business, or up-for-grabs. Individuals and businesses that want to take items from the business section must pay a monthly or annual subscription fee. The site also enables businesses and individuals to donate directly to charities and non-profit organizations that have registered with them. Businesses can also use the site to obtain reusable items.)

PERSONAL DIGITAL ASSISTANTS (PDAS)

See Electronic Equipment category on pages 33-37.

PHARMACEUTICAL WASTE (Medications)

The proper disposal of pharmaceutical waste, including expired or unwanted prescription and over-the-counter medications, has been a growing challenge nationwide. Traditionally, consumers have thrown unwanted medicines or pharmaceutical waste into their trash containers, have poured them down their sinks, or have flushed them down their toilets. While the latter two options can especially prevent the accidental or purposeful ingestion of inappropriate drugs or dangerously high doses of drugs by those for whom the medication was not intended, particularly children, they should no longer be chosen as disposal options. Pharmaceutical waste disposed of through these options can establish a long-term harmful presence in the environment from excreted residues or byproducts that sometimes cannot be removed by sewage treatment or water treatment processes. These residues pose unknown risks to people, animals, and the environment, especially our waterways. Human exposure to such residues can occur by contact, by ingestion of water, or by ingesting food crops grown on land treated with sludge or irrigated with wastewater.

The best option for households to dispose of their pharmaceuticals is to take them to an approved drop-off facility, such as a local hazardous waste collection center or one of the Sheriff's substations listed in this Guide. Please note that if a medication is a "controlled substance" as defined by the Federal Drug Enforcement Administration (DEA), it can only be taken to one of the Sheriff's substations. Hazardous waste collection facilities are not legally permitted to accept such material. Controlled substances are medications such as narcotics or tranquilizers that may be habit-forming or have the potential for abuse. Common examples include Codeine, Valium, Ritalin, and anabolic steroids. To see a more extensive list, please visit the website of the United States Department of Justice, Drug Enforcement Administration, Office of Diversion Control at www.deadiversion.usdoj.gov/schedules.

The following locations accept expired and unwanted pharmaceuticals or medicines from households only:

SOUTH COAST

Community Hazardous Waste Collection Center

(Please see list of public facilities on pages 54-59.)

Please dispose of **non-liquid** medications in drop-boxes without the bottles.

Sheriff's Department

1745 Mission Drive
Solvang, CA 93463
(805) 686-5000

PHARMACY-BASED MEDICATION MAIL-BACK PROGRAM

Many local pharmacies participate in Sharps Compliance Corporation's "Take-

Away" mail-back program for unwanted, non-controlled medications. Pre-paid postage envelopes are available for purchase to enable customers (including businesses) to ship their medications to the company's treatment facility. Customers can find a list of participating pharmacies at www.sharpsinc.com.

PHOTOCHEMICALS

See the list of hazardous waste collection facilities on pages 74-78.

PLASTICS

Hard plastics nos. 1 through 7, may be placed in commingled recycling containers in Santa Barbara County. For a description of the different types of plastic, please see page 11. Also, on pages 60 and 61, see the list of recycling drop-off and buyback centers where hard plastic containers may be dropped off.

Since July 1, 2007, retail stores in California having over 10,000 square feet of space have been required to establish a recycling program for plastic bags that contains the following components:

- Plastic bags for customers must contain the following wording: "Please return to a participating store for recycling."
- A plastic bag collection bin shall be placed at each store in a visible and easily accessible location and clearly marked to indicate its purpose for the collection and recycling of plastic bags.
- Reusable bags must be offered for purchase by a store's customers for potential use instead of a plastic or paper carryout bag.
- A manufacturer of a plastic carryout bag must develop educational materials to encourage a reduction in the use of plastic bags and the reuse and recycling of plastic bags.

Effective July 1, 2011, households and businesses in the **unincorporated areas** of Santa Barbara County may place **clean plastic film** (e.g. plastic bags of all types, stretch wrap, and bubble wrap) in their commingled recycling containers. Please note that customers of Waste Management should place the plastic bags in a plastic bag before depositing it into the recycling container, while customers of MarBorg Industries may place the bags in the container loose.

In Santa Barbara County, grocery stores such as Albertson's, Vons, Ralphs, and Lazy Acres accept plastic bags for recycling. Refer to your local telephone directory for the location nearest you. The following types of plastic bags are accepted:

- Grocery bags
- Bread bags, if there is no residue
- Retail bags with the hard plastic and string handles removed
- Newspaper bags
- Dry cleaning bags

- Clear bags labeled with a #2 or a #4.

The following types of plastic are NOT accepted by grocery stores:

- Sandwich, storage, and freezer bags or other plastic used for food packaging (e.g. Saran Wrap)
- Bubble wrap
- Stretch wrap
- Trash bags, including lawn and leaf bags.

The following locations accept plastics as described. Please ensure that the plastic bags are clean and dry and do not contain any material.

SOUTH COAST

MarBorg Industries' Recycling/ABOP Center

Waste Management, Inc.

195 West Los Angeles Avenue
Simi Valley, CA 93065
(805) 522-9400
(Drop-off days and hours: Monday through Saturday, 8:00 a.m. to 5:00 p.m.)

Gold Coast Recycling Center

5275 Colt Street
Ventura, CA 93003
(805) 642-9236
(Drop-off days and hours: Monday through Saturday, 8:00 a.m. to 5:00 p.m.)

Nike Factory Store Camarillo Premium Outlet Center

990 Camarillo Center, Suite 1030
1030 Camarillo Center
Camarillo, CA 93010
(805) 384-4480
(Please call ahead to inquire about making a larger donation.)

Nike Town Los Angeles

9560 Wilshire Boulevard
Beverly Hills, CA 90212
(310) 275-9998
(Can only accept 10 pairs of athletic shoes or less. Please call ahead to inquire about donating a larger quantity.)

Whole Foods Market

740 North Moorpark Road
(Bin located at northeast corner behind the store)
Thousand Oaks, CA 91360
(Drop-off days and hours: Monday through Sunday, 8:00 a.m. to 5:00 p.m.)

Shoes may also be sent directly to Nike at the following address:

Nike Recycling Center

c/o Reuse-a-Shoe
26755 Southwest 95th Avenue
Wilsonville, Oregon 97070

SMOKE DETECTORS

Ionization type smoke detectors contain a very small amount of radioactive material, Americium 241, while photoelectric type detectors do not contain any radioactive material. The ionization type smoke detectors are not accepted at the hazardous waste collection centers in Santa Barbara County, since such facilities are not permitted to accept radioactive material. Further, such smoke detectors should not be thrown in the trash. Therefore, these types of smoke detectors should be returned to one of the manufacturers/distributors listed in the table on page 79, for safe disposal. When returning a smoke detector to the manufacturer/distributor, include a note that indicates that the detector is intended for disposal and mail it to the address indicated.

SOAP/BOTTLED AMENITIES

Clean the World

3111 South Valley View Boulevard
Suite L-115
Las Vegas, NV 89102
<http://www.cleantheworld.org/>
E-mail: info@cleantheworld.org
(Accepts unwrapped bars of soap and bottled amenities from hotels [e.g. shampoos, conditioners, mouthwash.] Supplies will be included in hygiene kits distributed to homeless shelters or sent to less developed countries.)

(Accepts CDs and DVDs, as well as cassette tapes for recycling.)

OUTSIDE SANTA BARBARA COUNTY

GreenDisk

2200 Burlington
Columbia, MO 65202
(800) 305-3475
Fax: (573) 474-7458
www.greendisk.com
(Accepts video, audio, and computer tapes from households and businesses for recycling.)

Plastic Recycling Incorporated

2015 South Pennsylvania
Indianapolis, IN 46225
(317) 780-6100
(Accepts compact disks [CDs], digital video disks [DVDs], compact disk cases, video-tapes, and audio cassette tapes for recycling from households or businesses; no charge for accepting these materials, except for the cost of shipping items to firm.)

TELEPHONE DIRECTORIES

Telephone directories may be placed in commingled recycling containers in Santa Barbara County, in addition to other types of recyclables. Also, check the list of recycling drop-off and buyback centers listed on pages 66-68.

PrisonPenPals.com

<http://prisonpenpals.com/booksbehind-bars.html>

In addition to books and magazines, this organization encourages people to donate their old telephone books directly to prisons to the attention of the prison librarian. It also recommends notifying the post office that books are being mailed in order to receive the lower book rate.

TENNIS BALLS

The following suggestions for the reuse of used tennis balls were taken from *Green Light*, an on-line magazine:

- Use to muffle the sounds of bare metal legs hitting hard surfaces;
- Use to improve the grip on canes and walkers;
- Link together several tennis balls to make sound baffles and insulation panels;
- Use as a play toy for dogs and cats;
- Place on the end of a pole to use as a duster or cobweb remover; and
- Place on the ends of sharp or spiky objects.

OUTSIDE SANTA BARBARA COUNTY

reBounces, LLC

1313 Highway 65N, Suite F

Harrison, AR 72601

(870) 204-5171

<http://www.rebounces.com/recycle/>

E-mail: recycle@rebounces.com

(for recycling), reply@rebounces.com

(for reuse), or info@rebounces.com

(general information)

(Will accept 200 or more tennis balls from firms or individuals for recycling. Will provide a postage-paid mailing label. Box can be dropped off at any FedEx location. Also will repressurize tennis balls (minimum number of 200 tennis balls). Customer e-mails company by providing name, address, number of tennis balls or weight of box, and phone number. Company calls customer with a price quotation and records billing information. Customer mails tennis balls using prepaid shipping label.)

TILES (Ceiling and Flooring)

NORTH COUNTY

City of Lompoc Landfill

(Please see list of public facilities on pages 54-59.)

Santa Maria Area Recycling Terminal (SMART) (division of Bedford Industries, Inc.)

1940 West Betteravia Road

Santa Maria, CA 93455

(805) 922-4977 or (800) 242-8884

(Accepts ceiling and floor tiles for recycling.)

OUTSIDE SANTA BARBARA COUNTY

Armstrong World Industries, Inc.

2500 Columbia Avenue

Lancaster, PA 17603

P.O. Box 3001

Lancaster, PA 17604

(717) 397-0611

Armstrong will pay the shipping costs for businesses that send at least 30,000 square feet of their ceiling tiles to one of seven company plants. These plants then use these ceiling tiles as raw material to produce new ceiling tiles. To increase participation in the program, the company has also certified contractors who serve as regional consolidators of used tiles, a component of the program that helps firms that have less than 30,000 square feet of ceiling tiles. To find a certified recycling contractor, visit the firm's website: <http://www.armstrong.com/commceilingsna/article45691.html> Alternatively, you may call (877) 276-7876 or e-mail: bpotechline@armstrong.com.

Visit our Website at LessIsMore.org

To obtain general information on recycling and waste prevention, as well as information on the County of Santa Barbara's waste reduction programs, please visit our website at **www.LessIsMore.org**. At the website, you can obtain general recycling information on such topics as the following:

- Types of items that are recycled in the County of Santa Barbara's recycling program;
- A directory of firms that accept used materials for reuse or recycling;
- The benefits of recycling;
- A directory of firms that carry products containing recycled-content;
- Waste prevention tips based on the "reduce, reuse, and recycle" philosophy.

Further, you can obtain information on the following recycling programs offered by the County of Santa Barbara Public Works Department, Resource Recovery and Waste Management Division:

- Backyard Composting/Compost Bin Sale/Composting Workshops
- Business Recycling
- California Coastal Cleanup Day
- Christmas Tree Recycling
- Construction and Demolition Debris Recycling
- Electronics Recycling Program
- The Green Awards Program
- Hazardous Waste Recycling
- Illegal Dumping/Abandoned Vehicle Program
- Junk Mail Recycling
- Mulch/Green Waste Program
- Multi-Family Residential Recycling
- Operation Medicine Cabinet (Medications)
- Recycling Market Development Zone Program
- Recycling Resource Guide for Santa Barbara County
- School Recycling
- Sharps Collection Program
- Single-Family Residential Recycling
- Solid Waste Facilities
- Telephone Book Recycling

Junk Mail No More

Americans threw away 418,000 tons of unopened bulk mail in 1990. Everyday, people receive unsolicited mail known as “junk mail.” Your address is entered on a mailing list each time you make a donation, enter a contest, send in a subscription or warranty card, or buy something on credit or with a check.

HERE'S WHAT YOU CAN DO TO REDUCE UNWANTED MAIL:

1. Call or write organizations and ask them to remove your name and address from their mailing list. Look for prepaid envelopes and reply cards, and send a request to be removed from their mailing list.
2. If there is an 800 telephone number, call to request the removal of your name and address from a firm's mailing list.
3. Write or call mailing list brokers and ask to be placed on their “suppress” files.
4. Return unwanted junk mail. If the envelope is stamped “address correction requested” or “return postage guaranteed,” it can be returned unopened by writing “refused, return to sender” on the envelope.
5. When you provide your name to a publication, store, or organization, or when you order a product or service or complete a warranty card, request that your name not be shared.

MAILING LIST BROKERS

The companies below specialize in collecting and selling mailing lists. Write or call them and ask to be placed on their “**suppress**” files.

Direct Marketing Association

DMAchoice.org
P.O. Box 643
Carmel, NY 10512
(212) 768-7277, ext. 1888
www.dmachoice.org

*By registering through this website, you can request to be removed from specific companies or from one or more categories: credit offers, catalogs, magazine offers, and other mail offers (e.g. donation requests, bank offers, and retail promotions). Your name will be placed in the **suppress file** for three years. Alternatively, you may complete and mail a form to the above address and include \$1.00 for each form.*

Papillion, NE 68046
(800) 794-1404

When e-mailing a request to remove your name, please ensure that you put “Consumer Listing Removal” in the subject line. Removal lasts for a year.

To have your name removed from telemarketing lists, register your name at www.donotcall.gov or call (888) 382-1222.

REDUCE COUPONS, ADS, AND PRODUCT SAMPLES

If you don't want these items, check for the name of the company distributing the item and then write or call to request that your address be removed from the company's lists.

CONTACT CREDIT BUREAUS

Credit bureaus may sell names and addresses to banks and credit card companies. To have your name removed from the credit reporting agencies, call (888) 567-8688 (5-OPT-OUT) or visit Optoutprescreen.com.

Optoutprescreen.com

P.O. Box 2033-A
Rock Island, IL 61204-2033
(888) 567-8688

www.optoutprescreen.com

This website is a joint venture among the four major credit reporting companies (Equifax Information Services, LLC; Experian Information Solutions, Inc.; Innovis Data Solutions, Inc.; and TransUnion, LLC) that provides a centralized service to accept and process requests from consumers to opt in or opt out of offers for credit or insurance. Through this website, a consumer may request to “opt-out” from receiving offers of credit or insurance for a period of five years. If a consumer wants to permanently “opt-out” from receiving offers of credit or insurance, then a Permanent Opt-Out Election form may be obtained through this website and then mailed to this firm. Alternatively, for consumers who have previously submitted an “Opt-Out Request” and subsequently decide they want to receive such offers again, they may complete and submit an “Opt-In” form through this website.

JUNK MAIL REMOVAL SERVICES

The companies below specialize in having a consumer's name removed from direct marketing lists.

Catalog Choice

<http://www.catalogchoice.org/>

*This free on-line service allows consumers and businesses to select the catalogs that they want to receive and the frequency of receiving them, as well as identify those catalogs that they do not wish to receive. After registering, the registrant finds and sets the mail preferences for his/her catalogs. On the registrant's behalf, **Catalog Choice** then requests that the companies honor the preference. The companies take approximately 12 weeks after receiving the requests to process them.*

DirectMail.com

Skipjack Road
Prince Frederick, MD 20678
(888) 690-2252

For consumers who have registered on its National Do Not Mail List, DirectMail.com will notify mail order companies to remove a consumer's name from their lists for free. http://directmail.com/directory/mail_preference/

41 Pounds.org

298 West Saratoga
Ferndale, MI 48220
(866) 417-4141
Fax: (248) 738-2761

www.41pounds.org

E-mail: support@41pounds.org

For a fee of \$35.00, the firm will contact the catalog companies and over 30 direct marketing organizations to have them remove your name from their lists. It will also send the consumer pre-addressed postcards to those companies that require a signature. The service will last for five years, however, should the consumer start receiving any bulk mail within this five-year period, the firm will send unsubscribe requests to all of these organizations again at no charge to the consumer. This service will stop credit card offers, coupon mailers, sweepstakes entries, magazine offers, and insurance promotions, as well as the catalogs that are specified.

Local Search Association and Association of Directory Publishers

Formerly the Yellow Pages Association, these two associations operate a website whereby a firm or individual can obtain a list of publishers of yellow pages by entering a zip code. The firm or individual can then register to select the telephone directories that are received and to request to be removed from directory distribution lists. <https://www.yellowpagesoptout.com/>

AVOID WARRANTY CARDS

Warranty cards are used to collect names for mailing lists and to notify customers about product recalls. When you purchase a product, you may be covered by the manufacturer's warranty even if you do not send in the warranty card. Check with the manufacturer to determine your coverage and keep the receipt to establish proof of purchase.

Composting and Mulch Programs

Yard waste and food scraps can make up as much as 30 percent or more of a typical family's trash. These organic materials can be recycled by composting or yard waste recycling (mulching) to conserve landfill space and preserve nutrients.

COMPOSTING PROGRAM

Composting at home both recycles food scraps and yard waste, and produces a valuable soil amendment that will enhance your garden and landscape. Using compost can increase soil productivity, reduce your water bill, and help control weed growth.

Since 1992, the County of Santa Barbara has been encouraging home composting through education and composting bin distribution. Comprehensive backyard composting workshops are held every spring, and a composting booklet is made available through the mail and on-line. Also, half-price aerobic composting bins are sold year-round at the South Coast Recycling & Transfer Station and the North County Public Works Building. Their addresses are marked below with an asterisk (*). Over 5,000 composting bins have been distributed to the community through the program.

These composting bins, called the Earth Machine, are aerobic bins with no moving parts. Visit **LessIsMore.org/BinSale** or call to obtain the Earth Machine specifications. For people interested in vermicomposting (worm composting) or other styles of composting bins, take a look at the resources below.

To learn more about the composting program and different types of composting, visit **LessIsMore.org/Compost** or call (805) 882-3618 to obtain a free composting booklet or to talk to the County's Composting Specialist.

Composting bins can be purchased at the following locations:

Santa Barbara Area

Bill Palmasano

(805) 966-7474

Worm bins.

Santa Barbara Home Improvement Center

415 East Gutierrez Street

Online Resources

CompostBins.com
(a division of Hayneedle, Inc.)
(866) 579-5182

www.compostbins.com

Sells composting bins, compost tumblers, worm and kitchen composters, and composting equipment. The website also provides composting instructions and tips and a buying guide.

Composter Connection

1612 Gold Avenue
Bozeman, MT 59715
(406) 582-0920
Fax: (406) 587-0223
<http://www.composterconnection.com/site/index.html>
This company sells composting bins and tumblers, worm bins, indoor composters, composting tools and supplies, and compost and organic soils. It also provides comprehensive information on composting systems, how to compost, the science behind composting, environmental issues, and concerns involving composting.

Home Depot

www.homedepot.com
Aerobic bins that are available on-line only.

Wagle, Inc.

3943 Irvine Boulevard, #332
Irvine, CA 92602
E-mail: Sales@wagle.com
<http://www.wagle.com/composters>
Sells composting bins, tumblers, and accessories, as well chipper shredders, rain barrels, raised garden beds, composting toilets, and green lawn mowers.

MULCH PROGRAM

Most yard waste that is collected through the County's curbside green waste recycling program is processed into mulch that is then made available for reuse by the community. Mulching around plants can reduce water consumption, and thick applications can reduce weed growth as well.

Households in Santa Barbara County may obtain free mulch for their homes and gardens by accessing a pile that is maintained at the South Coast Recycling and Transfer Station (SCRTS), located at 4430 Calle Real in the unincorporated area of Santa Barbara County. This free mulch pile is accessible to households during the SCRTS's normal business hours of Monday through Saturday from 8:00 a.m. to 5:00 p.m. For a fee, qualified trucks (no pickup trucks or trailers) may also be loaded with large amounts of mulch. For more information, please call (805) 681-4345. Finally, the County will also deliver mulch for a fee in a dump truck, a roll-off truck, or a semi-truck, after a Purchase Agreement/Liability Waiver form has been signed. To schedule a delivery of mulch, please call (805) 681-4981.

Hazardous Waste

Hazardous waste, whether generated by a business or accumulated by a household, must be disposed of properly. Hazardous waste pertains to products that contain chemicals that are flammable, corrosive, reactive, or poisonous. Examples of hazardous waste generated by businesses include aerosols, asbestos, batteries, fluorescent bulbs, mercury, motor oil, and paint. Household Hazardous Waste (HHW) includes common household products such as leftover adhesives, aerosols, anti-freeze, drain openers, household batteries, household cleaners, paint, pesticides, pool chemicals, roof tar, solvents, stains, and used oil. If not disposed of properly, hazardous waste is a threat to the health of living beings and the environment.

THE IMPROPER HANDLING OR DISPOSAL OF HHW CAN RESULT IN SERIOUS ACCIDENTS:

Children and pets can be seriously harmed by eating, drinking, touching, or breathing toxic household chemicals.

Refuse haulers and disposal site personnel can be injured by discarded HHW (e.g. exploding aerosol cans, chemicals coming in contact with their face or hands, or poisonous fumes caused by mixed chemicals).

Firefighters can be injured by hazardous household chemicals when responding to a fire.

Groundwater used for drinking or irrigation can be contaminated when HHW products are poured and then seep into the ground.

Bacteria needed to break down sewer and septic tank wastes can be destroyed by untreated HHW.

Transporting & Labeling of Hazardous Waste

Caution should be taken when transporting hazardous waste. If possible, use the original product container or label the container if the contents are different from the label on the container. Cover all containers with a secure fitting lid and pack containers upright in a leak-proof box. You may be asked to provide a detailed inventory, if you have complex chemicals or laboratory waste. Containers must be no larger than five gallons each.

State and federal hazardous waste laws limit the use of hazardous waste collection facilities to businesses that qualify as a Conditionally Exempt Small Quantity Generator (CESQG). To qualify as a CESQG, a generator must not produce more than 100 kilograms (27 gallons or 220 pounds) of hazardous waste per month, including a maximum of 1 kilogram (1 quart or 2.2 pounds) of acutely hazardous waste. Businesses that generate more than this amount are required to use a licensed hazardous waste hauler to manifest and transport their waste.

Households may not transport more than 15 gallons (in maximum 5-gallon containers) or 125 pounds (dry weight) of HHW to a HHW collection facility per trip. Please contact the facility directly for more information.

The following facilities accept hazardous waste from individuals and businesses that qualify as a CESQG:

SOUTH COAST

COMMUNITY HAZARDOUS WASTE COLLECTION CENTER

University of California at Santa Barbara (UCSB)

Mesa Road, Building 565, Santa Barbara, CA 93106

(805) 882-3602

The Community Hazardous Waste Collection Center is a joint project of the Santa Barbara County Public Works Department and UCSB.

To reach the Community Hazardous Waste Collection Center, please follow these directions: From Highway 101, take the Los Carneros exit; At the end of the off ramp, turn south onto Los Carneros, heading towards the campus of the University of California at Santa Barbara (UCSB); After passing Hollister Avenue, turn left onto Mesa Road, which will lead you onto the campus; After reaching a "Stop" sign, continue on Mesa Road until you reach the second driveway on your right; There, you will see a sign that says, "Community Hazardous Waste Collection Center;" Pull into the driveway and drive into the Center, where an attendant will greet you.

The Collection Center, located on the UCSB campus, is available to Santa Barbara County households and businesses for disposal of small quantities of hazardous waste. This program is sponsored by the County Public Works Department and the Cities of Goleta and Santa Barbara, and is managed by the County Public Works Department.

Eligibility: Individuals and businesses in Santa Barbara County that qualify as a CESQG are eligible to use the Community Hazardous Waste Collection Center. They are required to sign a waiver stating that they are a CESQG. Businesses will be charged a user fee for processing and administration costs, plus a disposal fee based on the types and quantities of waste being disposed. Nonprofit organizations (501)(c)(3) are eligible for a 25 percent discount, and the user fee is waived.

Lompoc businesses are not eligible, since the City offers a CESQG program. In addition to the user fee, businesses in the cities of Buellton, Carpinteria, Guadalupe, and Santa Maria will be charged an additional 30 percent to cover overhead costs.

Materials Accepted: A wide variety of hazardous waste is accepted, including fluorescent lights and propane tanks. Call ahead to verify that a particular type of waste is accepted and to determine any restrictions. In addition, kitchen grease from households is accepted for recycling. Please ensure that as much of the food residue as possible is removed.

Asbestos Acceptance Guidelines: Asbestos is a naturally occurring group of mineral fibers that are flexible, fire resistant, and can pose a threat to human health when microscopic fibers become airborne and are inhaled. Asbestos is most commonly found in acoustical spray-on ceilings, pipe insulation, floor tile and mastic, roofing and fireproofing materials, brake and clutch linings, and textured paints. Any of these materials installed prior to 1980 may contain asbestos. Never dust, sweep, or vacuum these items or other products suspected of containing asbestos fibers.

To control harmful emissions of asbestos to the atmosphere, the Santa Barbara County Air Pollution Control District (APCD) enforces Federal laws that control work practices during the demolition and renovation of institutional, commercial, or industrial structures, excluding private residences and apartment buildings having no more than four units. Depending upon the amount and type of asbestos and the type of project, advance notification to the APCD may be required before asbestos is disturbed and/or removed. Please contact the APCD at (805) 961-8800 or visit their website at: www.sbcapcd.org/biz/asbestos.htm, if you have any questions.

If you are not sure whether a product contains asbestos, you can have a sample tested (see list of testing firms on next page). You can also contact the manufacturer to inquire about asbestos content or contact the United States Consumer Product Safety Commission (CPSC) at (800) 638-2772.

Materials Exchange Program: In an effort to divert waste from the regional landfills, the County of Santa Barbara manages a materials exchange program to encourage the reuse of materials that come into the Community Hazardous Waste Collection Center (Center). A materials exchange cart, located at the Center, offers a wide array of usable products. Products such as paints, cleaning supplies, pesticides, and home improvement products are available to members of the local community at no charge. Given the increasing costs of such items when purchased in stores, significant savings may be realized when obtaining these products from the exchange cart, and it is preferable to reuse rather than recycle them. Perhaps more importantly, by properly reusing these hazardous materials, people can help prevent the pollution of local lands and waterways that result from their improper disposal.

Days and Hours of Operation: Residents may dispose of HHW on Saturdays from 9:00 a.m. to 3:00 p.m. and on Sundays from 11:00 a.m. to 3:00 p.m.

Businesses and all non-households (including churches, schools, agencies and non-profit groups) may use the Collection Center on Fridays between 9:00 am and 3:00 pm., **by appointment only.** To make an appointment,

Once it has been determined that you have an asbestos containing material, please follow these guidelines for disposal of asbestos at the Community Hazardous Waste Collection Center:

◆ The asbestos containing material must be double bagged and sealed (use six millimeter plastic bags) when it is dropped off at the collection center. If you are abating the asbestos yourself, please call the County of Santa Barbara Public Works Department at (805) 882-3602 to obtain the appropriate bags at no charge. Asbestos delivered in normal trash bags or other types of containers is not acceptable.

◆ If your asbestos has been removed by a certified asbestos abatement company, the bags still need to enter the facility in good condition (rips and tears in the bags are not acceptable).

◆ The weight of each package should be limited to approximately 35 pounds;

◆ Households are limited to bringing a total of 125 pounds of material (approximately four bags) per trip for free.

◆ If you have large quantities of non-friable asbestos (i.e. unable to be crumbled by hand pressure) in excess of 125 pounds, please contact the County South Coast Recycling and Transfer Station at (805) 681-4345 to obtain a permit application and further instructions.

Asbestos bags may be obtained for free from the Community Hazardous Waste Collection Center or from the Resource Recovery & Waste Management Division of the Public Works Department, located at 130 East Victoria Street, Suite 100, in Santa Barbara. If you have any questions, please call (805) 882-3602.

ASBESTOS TESTING SERVICES

Channel Coast Corporation
123 Santa Barbara Street
Santa Barbara, CA 93101
(805) 899-1227

CITY OF CARPINTERIA ABOP CENTER

5775 Carpinteria Avenue
Carpinteria, CA 93013
(805) 684-5405, ext. 411

Eligibility: Residents in the City of Carpinteria are eligible to use the Center.

Materials Accepted: The Center accepts antifreeze, batteries of all types, latex paint, motor oil, oil filters, and up to three electronic items per visit (but no small appliances).

Days and Hours of Operation: The facility is open on the second and fourth Saturdays of each month from 10:00 a.m. to 2:00 p.m. For more information, call Monday through Friday, from 7:30 a.m. to 3:30 p.m.

CITY OF CARPINTERIA'S USED OIL SELF-SERVICE RECYCLING CENTER

5775 Carpinteria Avenue
Carpinteria, CA 93013
(805) 684-5405

Eligibility: Residents of the City of Carpinteria are eligible to use the Center.

Materials Accepted: The Center accepts antifreeze, motor oil, and oil filters.

Days and Hours of Operation: The facility is open on Monday through Friday, from 7:30 a.m. to 3:00 p.m.

MARBORG INDUSTRIES' RECYCLING/ABOP CENTER

725 Cacique Street
(Facility actually on Nopalitos Way.)
Santa Barbara, CA 93103
(805) 963-1852

Eligibility: Households in Santa Barbara County.

Materials Accepted: This facility accepts anti-freeze; batteries (household and vehicular); motor oil; oil filters; latex paint; fluorescent light bulbs; and a variety of computer, office, audio and video equipment to be recycled. It also accepts compact and digital video disks, as well as VHS tapes.

Days and Hours of Operation: This facility is open on Monday through Saturday from 8:00 a.m. to 4:00 p.m.

MARBORG INDUSTRIES' RECYCLING/ABOP CENTER

20 David Love Place
Goleta, CA 93117
(805) 964-1498

Eligibility: Households in Santa Barbara County.

Materials Accepted: This facility accepts anti-freeze, batteries (household and vehicular), motor oil, oil filters, latex paint, fluorescent light bulbs, and all types of computer, office, audio, and video equipment to be recycled. It also accepts compact and digital video disks, as well as VHS tapes.

Days and Hours of Operation: This facility is open on Monday through Friday from 9:00 a.m. to 4:00 p.m. and on Saturday from 9:15 a.m. to 4:00 p.m.

NORTH COUNTY

CITY OF LOMPOC HOUSEHOLD HAZARDOUS WASTE COLLECTION FACILITY

1585 North "V" Street, Lompoc, CA 93436
(805) 875-8024 and (805) 875-8027

Eligibility: Residents of the Lompoc Valley, including Mesa Oaks, Mission Hills, Vandenberg Village and the unincorporated areas east to Mail Road are eligible to use the Household Hazardous Waste Collection Facility (HHWCF). Small businesses that qualify as a Conditionally Exempt Small Quantity Generator may also use the facility.

Materials Accepted: The HHWCF accepts combustible, toxic, corrosive and reactive materials, including but not limited to: automotive fluids, cleaners, lawn and garden products, aerosol cans containing contents, antifreeze, batteries of all types, fluorescent tubes/bulbs, fuel, medications (expired medications are accepted but controlled substances are not), latex and oil-based paints, mercury containing devices, motor oil and oil filters, photochemicals, pool supplies, propane tanks, solvents, adhesives, stains and finishes, and non-friable and friable asbestos. Call ahead to receive instructions on the proper handling of asbestos. The facility also accepts a variety of electronic waste, including audio, visual, computer, and office equipment, as well as DVDs, CDs, audio and video tapes, small appliances, and video game systems. In addition, kitchen grease from households is accepted for recycling. Please ensure that as much of the food residue as possible is removed.

Days and Hours of Operation: The facility is open on Tuesdays through Fridays from 10:00 a.m. to 1:00 p.m. and on Saturdays from 8:00 a.m. to 11:00 a.m., **by appointment only.**

CITY OF LOMPOC LANDFILL

Avalon Road (south end), Lompoc, CA 93438
(805) 875-8024 or (805) 875-8027

Eligibility: Residents of the Lompoc Valley, including Mesa Oaks, Mission Hills, Vandenberg Village and the unincorporated areas east to Mail Road are eligible to use the Lompoc Landfill for the disposal of hazardous waste.

Materials Accepted: The Landfill accepts antifreeze, household and vehicular batteries, used motor oil, oil filters, treated wood waste, and nonfriable asbestos. It also accepts a variety of electronic waste, including audio, visual, computer, and office equipment, as well as DVDs, CDs, audio and video tapes, small appliances, and video game systems.

Days and Hours of Operation: This facility is open on Monday through Friday from 7:30 a.m. to 4:00 p.m. and on weekends and holidays from 10:00 a.m. to 3:45 p.m.

CITY OF SANTA MARIA HOUSEHOLD HAZARDOUS WASTE FACILITY

2065 East Main Street, Santa Maria, CA 93454
(805) 925-0951, ext. 7270

Eligibility: Households in Santa Barbara County, including the City of Santa Maria and unincorporated areas, may use the City's HHW Facility for the disposal of HHW. The City anticipates that in 2013 businesses that qualify as a Conditionally Exempt Small Quantity Generator (CESQG) may also use this facility **by appointment only.** Please contact the City for more information.

Materials Accepted: The City of Santa Maria's HHW Collection Facility accepts a variety of HHW from Santa Maria Valley households. Call ahead to verify that a particular type of waste will be accepted. In addition, the public may drop-off any type of used paint in any type of container. Latex paint in its original container with its label intact may be taken for free by members of the public, upon signing a Release of Liability form. For CESQGs, corresponding fees will be charged based on the weights of the types of hazardous waste that are disposed.

Days and Hours of Operation: The facility is open from 10:00 a.m. to 1:00 p.m. on Wednesdays and from 9:00 a.m. to 3:00 p.m. on Saturdays, but is closed on major holidays. Based on demand, these operating hours may be adjusted in the future. Please call ahead to confirm the operating hours.

CITY OF SANTA MARIA LANDFILL

2065 East Main Street, Santa Maria, CA 93454
(805) 925-0951, ext. 7270

Eligibility: Households and businesses in Santa Barbara County, including the City of Santa Maria and unincorporated areas, may use the City's landfill to drop-off electronic waste to be recycled.

Materials Accepted: All types of computer, audio and video, and office equipment. Non-friable asbestos is also accepted. Please call ahead to receive instructions on how to transport this material.

Days and Hours of Operation: Open seven days a week from 7:00 a.m. to 4:00 p.m.

SANTA YNEZ VALLEY RECYCLING AND TRANSFER STATION

4004 Foxen Canyon Road, Los Olivos, CA 93460
(805) 688-3555

Eligibility: Households and businesses in the Santa Ynez Valley may drop-off certain types of hazardous waste for proper disposal or recycling.

Materials Accepted: This facility accepts antifreeze; batteries; fluorescent light tubes/bulbs; motor oil and filters; latex paint, and a variety of computer, office, audio, and video equipment to be recycled. It also accepts compact and digital video disks as well as cassette tapes. Please call ahead to determine applicable fees.

Days and Hours of Operation: This facility accepts antifreeze, batteries (vehicular), motor oil and oil filters, and latex paint from households on Saturdays from 9:00 a.m. to 12:00 p.m. Household batteries, electronics, and fluorescent tubes/bulbs are accepted during the normal operating hours of Tuesday through Saturday from 8:30 a.m. to 4:00 p.m.

VANDENBERG AIR FORCE BASE BALFOUR BEATTY COMMUNITIES SELF HELP STORE

603 Juniper Street, Vandenberg Air Force Base, CA 93437
(805) 734-1672

Eligibility: Only Military Family Housing residents may use the Self-Help Store to drop-off household hazardous materials and electronic waste to be reused or recycled.

Materials Accepted: Balfour Beatty Communities manages a materials exchange program to encourage the reuse of materials that come into the Self-Help Store. Base residents may drop off products such as paints, cleaning supplies, pesticides, and home improvement products that will then be made available to others at no charge. Given the increasing costs of such items when purchased in stores, significant savings may be realized when obtaining these products from the Self-Help Store, and it is preferable to reuse rather than recycle them.

Days and Hours of Operation: Open Monday through Friday 8:00 a.m. to 5:00 p.m., Saturday 8:00 a.m. to 12:00 p.m., closed Sunday.

WASTE MANAGEMENT

97 Commerce Drive, Buellton, CA 93427
(805) 688-7456 and
1850 West Betteravia Road, Santa Maria, CA 93455
(805) 922-2121

Eligibility: Residents in Santa Barbara County are eligible to use the facility.

Materials Accepted: These facilities accept antifreeze, batteries (household and vehicular), motor oil (including agricultural oil), oil filters, latex paint and electronic waste.

Days and Hours of Operation — Buellton: The facility is open on Wednesday through Saturday from 8:30 a.m. to 5:00 p.m. It is closed from 11:00 a.m. to 11:30 a.m.

Days and Hours of Operation — Santa Maria: The facility is open on Monday through Saturday from 8:00 a.m. to 5:00 p.m.

Please note that semi-annual Household Hazardous Waste/Electronic Waste Collection events are held for households and businesses in the Santa Ynez Valley every spring and fall.

In addition, an annual Household Hazardous Waste/Electronic Waste Collection event is held in the Cuyama Valley every fall.

For more information on these events, please call (805) 882-3615.

For businesses and households that have quantities of hazardous waste that exceed the CESQG or household limits and that wish to dispose of this material all at once, they may call one of the private hazardous waste contractors who will pick-up all types of hazardous waste (except where noted) for a fee:

FULL SERVICE: ALL MATERIALS

(Except Where Noted)

Smoke Detector Disposal Information

The most common type of smoke detector used in residential homes contains a minute amount of radioactive material*. Although the amount of radioactive material contained in these detectors is so small that it does not pose a risk to human health, some localities, including Santa Barbara, do not allow them to be disposed of with municipal waste. In this case, smoke detectors that contain radioactive material can be returned to the manufacturer for disposal. When returning a smoke detector to the manufacturer, include a note that indicates that the detector is intended for disposal and mail it to the address listed on the back of the detector.

The following manufacturers/distributors of smoke detectors will take back smoke detectors that they manufacture:

| MANUFACTURER/ DISTRIBUTOR | PHONE NUMBER | ADDRESS FOR RETURN | NOTES |
|--|----------------------------|---|---|
| FIRST ALERT/ BRK/FAMILY GUARD | (800) 323-9005 ext. 2 | Please call ahead for mailing instructions. | Accepts First Alert/BRK, and Family Guard brands of smoke detectors for a fee of \$1.00 each. Website addresses: www.FirstAlert.com and www.BRKElectronics.com |
| HONEYWELL | (800) 328-5111 ext. 4 | Returned Goods, Honeywell Inc. Dock 4-MN10-3860 1985 Douglas Drive Golden Valley, MN 55422 | Accepts Honeywell smoke detectors only. Website address: www.customer.honeywell.com |
| SYSTEM SENSORS | (800) 736-7672 ext. 1 | Call to receive a reference number and return information. | Will accept "System Sensor" brand only. Please include a payment of \$3.00 for each smoke detector mailed to cover the firm's recycling costs. |
| USI ELECTRIC/ UNIVERSAL | (800) 390-4321 ext. 238 | Attention: Disposal Department 11407 Cronhill Drive, Suite A Owings Mills, MD 21117 | Return only detectors that say "ionization" on the back. Only USI Electric or Universal brand smoke detectors accepted. Please enclose a note that indicates that the smoke detector is being returned for recycling. Website address: www.USIElectric.com |

*Ionization type smoke detectors contain Americium 241. Photoelectric type detectors do not contain radioactive material.

The following company also accepts ionization-type smoke detectors for recycling:

Curie Environmental Services, LLC

4020 Vassar Drive, NE, Suite D

Albuquerque, NM 87107

(505) 888-9392

Fax: (866) 671-4458

<http://www.curieservices.com/>

E-mail: info@curieservices.com

For a fee of \$8.00 per smoke detector, this company accepts ionization smoke detectors from households for recycling.

Consumers should contact the company to obtain shipping information and to prepay. For larger amounts, it also offers the CuriePack, which includes a shipping box, a yellow five-gallon plastic container to hold the smoke detectors, complete packaging instructions, and a prepaid United Parcel Service shipping label. The container can hold up to 25 smoke detectors. Even larger containers are available for commercial/industrial customers.

Used Motor Oil Collection Centers

The following is a listing of used oil collection centers by zip code. Unless otherwise indicated, these centers will accept used motor oil and oil filters free of charge.

SOUTH COAST

93013

**City of Carpinteria
ABOP Center

listing under
zip code 93109.

MONIE PHOTOGRAPHY

Sharps Collection Program

What are Home Generated Sharps?

Home Generated Sharps (HGS) are hypodermic needles, pen needles, intravenous needles, syringes with needles, disposable lancets, and other devices that are used to penetrate the skin for the delivery of medications derived from a household, including a multi-family household.

Where can I obtain a sharps container?

Sharps containers can be purchased through medical supply companies and pharmacies, or obtained for free at one of the County's five health clinics listed in this section. In addition, single-family households in the unincorporated areas of the County and in the cities of Buellton, Goleta, and Solvang are eligible to receive a free, postage-paid, mail-back container from their local waste hauler, MarBorg Industries or Waste Management. Once the container is full, the household can then mail it to the pre-addressed location, where the sharps will be properly disposed.

Where can I take my sharps container once it is full?

The locations listed on the following page will accept home generated sharps in proper containers from residents of Santa Barbara County. Most drop-off locations are free unless otherwise noted. Fees for mail-back service vary by company. Please call ahead to confirm cost information, hours of operation, and address. Never leave sharps containers unattended at a collection facility.

How many sharps containers may I dispose of?

For drop-off facilities, residents may not dispose of more than two sharps containers during any visit and are limited to one visit per week. Hospitals, clinics, medical practices, pathology labs, convalescent homes, group homes, nursing facilities, hospices, and veterinarian hospitals are **not** eligible to use this program. Each collection facility reserves the right to refuse to accept sharps.

HOW SHOULD I DISPOSE OF MY SHARPS?

Effective September 1, 2008, it is illegal to place home-generated sharps in the trash or in any type of recycling bin (including those for green waste and construction and demolition debris). Home-generated sharps must be disposed of at an approved facility (such as a hospital, clinic, pharmacy, or household hazardous waste collection center) or through an approved mail-back program. In addition, sharps should only be transported in an approved container that is rigid and puncture-resistant. Such containers are leak-proof, red, constructed of rigid plastic, and have a biohazards label. Sharps containers should only be filled three quarters full before being sealed for disposal.

Coffee cans, aluminum beverage containers, plastic milk jugs, and other like containers are **not** appropriate containers for the storage of sharps and

cannot be accepted. You should **never** dispose of your HGS or sharps containers in the regular trash. Please remember the following:

- ◆ **Place sharps in an approved sharps container immediately after use with the point down;**
- ◆ **Do not attempt to bend or break a needle or syringe;**
- ◆ **Do not put the cap back on a needle;**
- ◆ **Keep all sharps and disposal containers out of the reach of children.**

For more information, please call the County Public Works Department, Resource Recovery and Waste Management Division, Household Hazardous Waste Specialist, at (805) 882-3615.

Drop-Off Facilities

SOUTH COAST

Caldwell Pharmacy

235 West Pueblo Street
Santa Barbara, CA 93105
(805) 682-7353

Open Monday through Friday 9:00 a.m. to 6:00 p.m. and Saturdays 9:00 a.m. to 1:00 p.m.; a \$5.00 disposal fee is charged per container.

Santa Barbara County Public Health Department Carpinteria Clinic

Buying Recycled

RECYCLED-CONTENT PRODUCTS (RCPs) DESERVE ANOTHER LOOK.

Recycled-Content Products (RCPs) first became available in the early 1970's following the first Earth Day celebration. The few products sold in those days were often crudely designed, using poor materials, with little or no research or testing. The RCPs of today are an entirely new breed of high-tech, high-value, earth-friendly products.

Purchasing RCPs presents a tremendous opportunity. First and foremost, RCPs provide residents and businesses with a quality product capable of meeting any performance specifications and consumer needs. Secondly, you can save money buying recycled content products from the extensive variety available. Additionally, purchasing RCPs is good for the environment by conserving natural resources and energy, and preserving landfill space. Economic development at the local level is also enhanced when consumers and businesses buy RCPs from local manufacturers and suppliers.

The following RCP procurement information is supplied by the Buy Recycled staff of the California Department of Resources Recycling and Recovery (CalRecycle). For more information, call the Buy Recycled staff at (916) 341-6199 or send an email message: buyrecycled@calrecycle.ca.gov.

DISPELLING THE MYTHS

Price

Many RCPs are less expensive than comparable non-recycled products. Like any product, price is dependent upon quality, quantity ordered, whether the product is a specialty item or a more common product, etc.

Quality

Many RCPs are at least as good as non-recycled products. Companies spend millions of dollars to research materials and test products. RCPs have inherent qualities that result in improved performance characteristics. For example, the fibers of recycled newsprint curl more easily through the printing presses; re-refined oil contains only the strongest molecules; plastic lumber lasts longer and requires less maintenance than comparable wood or concrete products; and recycled printing and writing papers have increased printability and readability.

Availability

With the decrease in price and increase in quality, demand is increasing. Contractors and vendors can easily obtain RCPs, if they are requested to do so. Many RCPs are now as easy to find and obtain as any other product. RCPs are now available through supermarkets, discount, retail and club/ membership stores. RCP guides are available from governmental offices, industry associations, and environmental groups.

INCREASING COMFORT LEVEL

Experiment

Given a chance, RCPs will prove their value. They provide an opportunity to save money and improve the environment. RCP categories that are safe bets for starting out include janitorial paper products, office paper products, recycled latex paint, compost, and re-treaded tires. Choose a product from a manufacturer or a vendor you already trust, and experiment with the most common RCPs to increase your comfort level.

Experience

Take it one step at a time if RCPs are new to you. Stay with what you know best. As your positive experiences grow, try a new product and/or a new vendor. Brainstorm with other interested people. Obtain help from CalRecycle's Buy Recycled staff. You will find yourself gaining the experience necessary to provide assistance to others. Before long you will be making bigger and better RCP purchases from the wide variety of available products.

Network

Share your experiences with others. Some people may have more experience buying RCPs within a specific product category or using a reliable vendor. Learn from those around you and try to avoid the few bad apples. Before long, you will be proclaiming the virtues of buying RCPs for all of your needs.

RCP SOURCES

Identify Vendors, Product Suppliers, and Stores

You may already be buying RCPs without even knowing it. Ask your vendors or the stores you patronize to determine whether they carry RCPs. For businesses, talk to manufacturers directly to determine the recycled content of products.

You may not need to find new vendors, product suppliers, or stores that carry RCPs. With the rise in demand for RCPs, supply has followed. Ask those you are currently doing business with to substitute RCPs for non-RCPs whenever possible. Tell them you prefer RCPs and that you would like more to be available.

Buying Green Guide

The State of California has developed the “Buying Green Guide” to help purchasing officials buy environmentally friendly products in such categories as the following: appliances, building and maintenance, cleaning supplies, electronics, food service, grounds maintenance, office equipment, office supplies, paper products, safety, and transportation. Guides for suppliers and consumers will be available in the near future. To access the on-line Guide for buyers, visit: <http://www.dgs.ca.gov/buyinggreen/Home/BuyersMain.aspx>

CalRecycle Recycled-Content Product Directory

California Department of Resources Recycling and Recovery (CalRecycle) maintains a database that provides information on RCPs as well as manufacturers, distributors, reprocessors, mills, and converters that manufacture or supply these products or the recycled materials to make them. Searches may be conducted by product, brand name, company name, or category. The database may be accessed through the Internet at: <http://www.calrecycle.ca.gov/RCP/>.

RecycleStore

CalRecycle’s RecycleStore is an on-line catalog of RCPs manufactured in the Recycling Market Development Zones. Through this catalog, manufacturers may be contacted directly in order to obtain more information about their products or to purchase them. The RecycleStore can be accessed by visiting: <http://www.calrecycle.ca.gov/recyclestore/>.

MAINTAINING RECORDS

Track

Once RCPs are identified, record and track your purchases. Keeping records may help you identify the best RCP purchases to make your dollars stretch. It also will be valuable information for procurement policies or ordinances. Other people will be interested in RCP procurement data to help them establish their own buy-recycled programs.

Evaluate

Evaluate your RCP purchases regularly. Keeping accurate records will enable you to make adjustments for the following year to take full advantage of the RCP procurement opportunities and make your budget last longer. If the RCP procurement data is required for any report or summary, you will be better prepared to recommend increased RCP procurement activities.

Directory of Recycled-Content Products

This section provides examples of recycled-content products (RCPs) that you may be able to use in your home or business and provides some local RCP suppliers. For residents, ask businesses that you patronize whether or not they carry products containing recycled content. If they do not carry such products, request that they do so. For businesses, ask your current supplier for information on the RCPs that they carry. If you are unable to find a local vendor for the RCPs you desire, please contact the Resource Recovery and Waste Management Division (882-3600) for information about companies that carry RCPs.

OFFICE SUPPLIES

- stationery, letterhead, copy and fax paper
- notepads, legal pads, telephone message pads
- computer paper
- calendars
- binders, file folders and file storage boxes
- envelopes, index cards and labels
- carbonless paper
- self-stick notes
- padded mailing bags
- tissue paper, toilet paper, and toilet seat covers
- refillable laser printer and copier toner cartridges, re-inked printer ribbons
- clipboards
- desktop accessories and paperweights
- diskettes
- pens and pencils
- paperclips

PLASTIC PRODUCTS

- report covers
- letter trays
- plastic garbage liner bags
- trade show displays
- packaging materials
- grocery bags

Check these local stores for recycled-content office products:

 (206) 356-2925
www.ecobly.com
 E-mail: info@ecobly.com
 This website maintains an on-line directory of companies that make products "locally, sustainably, and responsibly" in such categories as accessories, building materials, cards/stationery, clothing, energy, furniture, garden, home décor, kitchen/bath, office equipment, pet care, publications, recreation/hobbies, and toys.

EcoMail

www.ecomall.com
 This website provides links to hundreds of websites that offer "green" and ecologically sensitive products and resources.

Recycled Products Cooperative

P.O. Box 234141
 Encinitas, CA 92023
 386 North Coast Highway 101
 Encinitas, CA 92024
 (760) 436-5170
www.recycledproducts.org/index.html
 E-mail: information@recycledproducts.org
 The Recycled Products Cooperative (RPC) is a nonprofit agency dedicated to natural resource conservation. It seeks to increase the use of recycled copy paper by selling recycled paper containing 30 percent or 100 percent post-consumer content. The RPC also offers a wide variety of other office

products that contain recycled content, including: binders, report covers, dividers, calendars, planners, briefcases, toner cartridges, compact disks, desk supplies, filing supplies, janitorial supplies, office equipment and supplies, and recycling containers. Membership is free.

United States Environmental Protection Agency (USEPA)

Comprehensive Procurement Guidelines
<http://www.epa.gov/epawaste/conserve/tools/cpg/index.htm>
 Users may search this website of recycled-content products by category, product, material, or state. Products are grouped in such categories as the following: construction, landscaping, non-paper office, paper, park and recreation, transportation, vehicular, and miscellaneous. Resource Guides (Guides) corresponding to each of these categories are also available. The Guides provide information on USEPA's recommendations on recycled-content products, case studies, associations, and websites. This website also includes a Product Supplier Directory that enables the visitor to search for suppliers by product, state or country, or supplier name.

Reducing Waste Makes Plain Business Sense

You know the formula for a successful business: maximize income and minimize costs. Join leading businesses that accomplish both by following the waste reduction and recycling techniques in this guide.

Recycling and waste reduction make good business sense because:

- ◆ *Net operating costs can be reduced.*
- ◆ *Your company can save money on the purchase of recycled-content or remanufactured goods.*
- ◆ *Customers, employees and the community take special notice of environmentally friendly business practices.*
- ◆ *Best of all, it doesn't cost much to begin a waste reduction and recycling program.*

We Are Here to Help

If you need assistance establishing a recycling and waste reduction program, call the Resource Recovery and Waste Management Division. We are committed to helping local businesses and property owners recycle, reduce waste, and buy products made from recycled materials. This resource guide will help your company develop a successful recycling and waste reduction program.

We can provide:

- ◆ *Individual business consultations, waste audits, and on-site assistance.*
- ◆ *Referrals to recycling service providers.*
- ◆ *Business waste reduction guides and fact sheets.*
- ◆ *Presentations at conferences or business meetings.*
- ◆ *Information about the Green Business Program, Santa Barbara County.*

For information about any of these services, please call the Resource Recovery and Waste Management Division at 882-3616 or visit us on the web at www.lessismore.org.

The following is a step-by-step guide to help you design a program specifically for your business. By implementing a program, you can save money and natural resources, and impact your bottom line. You can start by recycling just a few items and slowly increase the amount of material that you recycle. If you already have a program in place, this section may help you determine ways to expand your existing program. Remember, if you need further assistance with your business recycling program, please call 882-3616.

Directions for Starting a Recycling Program

STEP 1 **WINNING ORGANIZATIONAL SUPPORT**

Management Support

Employee participation in a recycling program is greater when there is enthusiastic support by management. In order to obtain management's support, be sure to explain the environmental benefits, which include saving energy and resources, as well as reducing air pollution and the amount of waste that is sent to a landfill. Also, explain the economic benefits, including the potential for savings on waste prevention and disposal costs.

STEP 2 **CHOOSING YOUR RECYCLING COORDINATOR**

Select an employee to coordinate waste reduction, reuse, and recycling activities.

Consider someone who is interested in environmental matters and has some knowledge about waste reduction and recycling. The coordinator should be someone who is enthusiastic, communicates well with co-workers, and who can dedicate enough time in the immediate future to establish an effective program.

The Recycling Coordinator's primary responsibilities will include:

- *Looking for opportunities to prevent waste by purchasing reusable, durable, and repairable equipment and supplies.*
- *Working with suppliers to reduce packaging.*
- *Reusing items and altering other waste-generating activities wherever possible.*
- *Targeting materials for mulching and recycling, and selecting and working with your solid waste service provider and the Resource Recovery and Waste Management Division to arrange pickup schedules and review other program specifics.*
- *Setting up a collection bin system in common work areas.*
- *Locating storage areas and developing a system for moving materials to storage areas.*
- *Networking with other businesses and local governmental staff; attending training sessions and seminars on waste management, if possible; and subscribing to waste management publications.*
- *Promoting waste reduction awareness in the workplace.*
- *Monitoring, evaluating, and changing the system as needed.*

A large business can form a recycling committee.

Consider forming a committee with representatives from key departments, such as purchasing, receiving, and maintenance, to discuss how to best implement waste reduction at your workplace. Include fellow employees in the development of the program, including department heads and support staff. The broader the base of support and enthusiasm, the greater your chances of cooperation and success.

STEP 3 ESTIMATING YOUR WASTE REDUCTION POTENTIAL

Opportunities for waste prevention are often hidden in inefficient processes. Looking for ways to operate more efficiently is good business.

To develop an effective program, conduct a waste evaluation to estimate your waste reduction potential and understand existing waste management practices. A waste evaluation identifies the materials generated and their path through your facility from point of purchase to ultimate disposal. This can be a simple visual survey of your trash, or you can sort, weigh, and measure the volume of all the materials in your garbage to obtain more detailed information regarding the make-up of your company's waste stream. Contact the Resource Recovery and Waste Management Division at 882-3616 to schedule a free waste audit.

I. Where does the waste come from and what is recoverable?

Walk through your facility and note:

- *What type of work is done in each area?*
- *What activities produce waste?*
- *What type of waste is produced?*
- *What waste can be prevented, reused, or recycled?*

Look in the containers where waste is stored to determine the type of waste being generated by your business. Different businesses will generate different types of preventable, reusable, or recyclable materials. For example, an administrative office may generate white office paper, while a retail outlet may generate large amounts of corrugated cardboard. It is also necessary to evaluate where recyclable containers could be placed, their size, and the frequency of service you will require.

2. What materials are commonly purchased and discarded?

Ask purchasing and maintenance staff about current purchasing and disposal practices to get a better idea of the flow of materials through your facility and the types of waste being generated. Keep in mind "What if?" What if this material could be reused? What if this material could be packaged differently? What if the activity could be altered to prevent waste?

If applicable, interview your landscaper/groundskeeper or other responsible staff about green waste (grass clippings, leaves, etc.) and potential opportunities for reduction through composting, mulching or grasscycling. Grasscycling is the natural recycling of grass by leaving the clippings on the lawn when mowing.

3. Understand your waste hauling system.

It is important to know who your solid waste service provider is and to understand your existing waste hauling system.

Direct service means that the hauler deals with your account individually and only refuse from your business is going into the dumpster. Large businesses tend to have direct service; therefore, cost savings can be realized when recycling services are added, due to decreased disposal costs. **Shared service** is usually provided by the property manager for a group of businesses. If this is the case, contact your property manager and inquire about recycling. Shared service provides a great opportunity to develop a cost-effective recycling program by combining materials with other commercial establishments on the property.

4. Are there recycling programs at neighboring businesses?

What wastes are being reduced, reused, and recycled? If neighboring businesses have recycling programs, inquire about the logistics and details of these programs. Often, simple and practical systems can be duplicated. There is no reason to re-invent the wheel. Determine the types of waste that other businesses have eliminated or reduced, the types of materials that are reused or recycled, how the wastes are collected and transported, and the costs associated with the program. Which materials are reused or recycled, how are they collected and transported, and what costs are associated with the program? Find out if it is possible to consolidate your efforts with other businesses, making recycling more cost-effective. Also, learn the number of people employed at your workplace and whether or not you plan to coordinate with neighboring businesses so your solid waste service provider and the Resource Recovery and Waste Management Division can better estimate your potential for recycling.

5. Organize your information

Once you have completed your waste evaluation with the help of the Business Recycling Coordinator (882-3616), you will have a good idea of the types and quantities of recyclable materials your company produces and opportunities for waste prevention. You will then be ready to plan your program and to contact your solid waste service provider to initiate service.

STEP 4

CONTACT THE RESOURCE RECOVERY AND WASTE MANAGEMENT DIVISION OR YOUR SOLID WASTE SERVICE PROVIDER

Contact your existing solid waste service provider or the Resource Recovery and Waste Management Division to arrange for delivery of recycling bins or carts (see contact list on inside back cover). Recycling will undoubtedly be a major component of your waste management program and will require coordination with your solid waste service provider. Recycling is more cost-effective when integrated with existing waste removal operations. If your company pays for waste disposal based upon the frequency of service or the amount of waste generated rather than a flat fee, waste prevention and recycling may be financially rewarding. Often, businesses can reduce disposal costs.

STEP 5

SETTING UP YOUR PROGRAM

Analyze the costs and benefits of waste prevention activities.

Analyze the purchase costs, labor costs, utility costs, and disposal costs of waste prevention activities such as purchasing longer-lived, durable, or repairable supplies and equipment. While it may cost more up front, you will probably find there are significant cost savings in the long term.

Choose appropriate recycling containers.

The size and style of recycling equipment varies. Ask your solid waste service provider or the Resource Recovery and Waste Management Division for the size receptacles that are suitable for your situation. In many cases, the County will provide containers free of charge. You may wish to purchase your own personalized recycling bins with your company's logo or convert existing trash containers into recycling containers. Many recycling containers are made of recycled materials; therefore, purchase and use them whenever possible.

Locate and label workspace recycling bins strategically.

To encourage participation among employees and to avoid contaminating recyclables, it helps to place recycling bins in all heavy traffic areas, common work areas, and most importantly, in locations where the recyclables are typically generated. Recycling bins near copy machines and desktop containers for office paper, as well as larger, leak-resistant, recycling bins for bottles and cans in cafeteria areas, are typical examples. It is important to clearly label recycling containers in order to prevent employees and visitors from using them as trash bins. Make sure there are plenty of trash and recycling containers.

Storage areas.

Your solid waste service provider and the Resource Recovery and Waste Management Division will assist you in setting up the main storage area so that both trash and recycling dumpsters are accessible for pick-up crews and any heavy equipment that may be needed for unloading and loading operations.

Use in-house staff to consolidate the recyclables from the recycling containers to one main storage area. There are several reasons to use in-house staff to consolidate the recyclables:

- Recycling bins in the workplace will not overflow.
- Recycling programs are generally more cost-effective when integrated with existing waste disposal and removal systems. Often, existing maintenance operations can be adjusted to include recycling with no significant increase in workload. Many companies will use an alternating collection system in which assigned staff collect recyclables one day and refuse the next. Also, for office settings, consider whether your recyclables would be better consolidated by an evening clean-up crew as opposed to regular daytime personnel.
- When introducing waste-handling personnel into the new program, explain that they are handling both types of materials, but will empty recyclables and trash into different containers.
- If existing waste removal personnel are not involved with the recycling program, be sure new personnel are made aware of your new program in order to avoid mixing and contaminating materials.

Set up a reuse area.

If you have available space, set up a reuse area, where reusable items can be stored rather than thrown away. Encourage employees to reuse these items in the workplace or at home. Make reusable items available to customers, or donate them to a school or charitable organization.

Establish a composting or grasscycling program.

Grass clippings and other plant prunings make up a surprisingly large portion of California's waste stream during the growing season. If your business produces green waste, such as plant or lawn clippings, consider composting the materials on site or use the materials as mulch for landscape plants. Or start grasscycling, that is, leave your grass clippings on the lawn when mowing.

Coordinate with neighboring businesses to collect greater amounts of materials and form purchasing coalitions.

In many businesses, especially those in malls or groups of stores on the same property, waste management is provided by the lessor, and refuse charges are incorporated into the rent. As you know from Step 3, this type of service is referred to as shared service and can lead to cost-effective recycling programs, since neighboring businesses can combine recyclables to collect greater amounts of material.

If feasible, you can also work with neighboring businesses, trade associations, or other members of your industry type to lower the price of recycled products by buying in larger quantities.

STEP 6 EDUCATING AND MOTIVATING EMPLOYEES

To prevent waste and collect contaminant-free recyclables, your participating staff must be knowledgeable about program guidelines and the benefits of participating.

Announce your program.

An announcement issued by the company's owner or senior officer regarding the start of a recycling program is a key element in helping to sell the recycling program to employees so they become dedicated and involved in the effort. Post it conspicuously and encourage your employees to read it. Or better yet, reduce paper waste and announce the program on your electronic mail system! Some companies give their employees coffee mugs or desktop paper recycling containers emblazoned with company and recycling logos.

An environmental policy statement should be included with the announcement, highlighting the benefits of waste reduction (e.g. saving energy and resources and reducing air pollution and the amount of waste that is sent to a landfill) and outlining separation and collection procedures. The policy statement should also explain the economic benefits, including potential for savings on waste prevention and disposal costs. Issuing a company environmental policy statement is one way for manage-

ment to show commitment to a successful program.

Establish a contact for recycling questions and information.

Some employees might be uncomfortable with the new system. Therefore, it is important to have an outlet for questions and information. The recycling coordinator is most familiar with the details and logistics of the program and is the most appropriate person to handle questions from other employees. The coordinator's name, phone number, and e-mail address should be included in the memo announcing the program.

Employee training is essential for a successful program.

Your coordinator should provide initial training for all staff and refresher sessions as necessary. New employees should receive training when hired. Use posters and other training materials to disseminate information to employees.

Encourage feedback and suggestions from employees.

Incentives such as contests and prizes will help ensure success. Give credit and recognition to employees for their efforts.

Follow-up publicity.

It is important to continually publicize the success of your waste reduction efforts and address any shortcomings. Success encourages continued participation. Information about quantities of waste prevented and disposal cost savings should be shared with staff. Problems such as material contamination or low participation rates should also be shared. Reminders like these will help maintain a successful program.

STEP 7

PURCHASING WITH WASTE PREVENTION IN MIND

Waste prevention, also known as source reduction, is any action undertaken to eliminate or reduce the amount or toxicity of materials before they enter the municipal solid waste stream. This approach ultimately conserves resources, promotes efficiency, and reduces pollution.

◆ If your business purchases and uses products that are reusable, durable, and repairable, you will be cutting down on the amount of waste that is produced and land-filled. These products will last longer and save you money in the long run. Urge your suppliers to provide you with these items.

◆ Remember to also request supplies and materials that are recyclable. If you manufacture a product, keep the recyclability of that product in mind.

◆ Money saved through avoided disposal costs can be donated to a charity selected by employees, or applied toward employee holiday parties, labor-saving equipment for employees, or the purchase of additional waste reduction equipment.

◆ Buy products with recycled content. Check out the Directory of Recycled-Content Products section of this guide (pages 86-92) for information on local stores and websites that may carry recycled-content products.

◆ The collection of recyclable materials is one step of the three-step process we call recycling. The reprocessing of these materials into new products and the purchase of these new products by consumers and businesses are the essential last two steps in closing the loop of the recycling process. When you buy goods with recycled content, your purchases help to create a demand for materials collected in recycling programs. Business purchases of recycled-content products are extremely important to develop and maintain markets for the increasing quantity of materials that will be diverted from landfills.

◆ Reduce packaging waste. Did you know that packaging makes up approximately one third of all solid waste in California? Coalitions of government, public interest and industry groups across the nation are recommending that reduced packaging guidelines be followed to cut down on packaging waste. Basically, they are suggesting that packaging be eliminated whenever possible; be minimized, refilled or reused; be recyclable; and be made from recycled materials.

◆ Tell your suppliers that you are interested in buying products that contain less packaging whenever feasible. Ask them to take back shipping boxes to reuse or recycle. Make reduced packaging available to your customers too.

Other Resources for Information about Waste and Pollution Prevention, Recycling, and Reuse

California Air Resources Board

1001 "I" Street
Sacramento, CA 95814
P.O. Box 2815
Sacramento, CA 95812
(800) 242-4450
www.arb.ca.gov/homepage.htm

The mission of the California Air Resources Board (CARB) is to promote and protect public health, welfare and ecological resources through the effective and efficient reduction of air pollutants while recognizing and considering the effects on the economy of the state. The CARB produces fact sheets, brochures, and videos in such areas as the following: air pollutants, air toxics, asbestos, bicycles, consumer products, diesel topics, energy, fuels, general topics, health, marine engines, permitting activities/certifications, seminars, small off-road engines, and vehicles.

California Department of Resources Recycling and Recovery (CalRecycle)

1001 "I" Street (Headquarters and Other Programs)
P.O. Box 4025
Sacramento, CA 95812-4025
(916) 322-4027
and
801 "K" Street, MS19-01
(Beverage Container Recycling Program)
Sacramento, CA 95814
1-800-RECYCLE or (916) 322-4027
<http://www.calrecycle.ca.gov/AboutUs/>

On Jan. 1, 2010 California's recycling and waste diversion efforts were streamlined into the new California Department of Resources Recycling and Recovery—CalRecycle.

*CalRecycle manages programs created through two landmark initiatives—the Integrated Waste Management Act and the Beverage Container Recycling and Litter Reduction Act—that were formerly part of the California Integrated Waste Management Board (CIWMB) and the Department of Conservation, respectively. Now housed in the **Natural Resources Agency**, CalRecycle merges the duties of the Board with those of DOC's Division of Recycling to best protect public health and the environment by effectively and efficiently managing California's waste disposal and recycling efforts.*

*CalRecycle is currently comprised of **two program divisions: Waste Management and Recycling**. The Division of Waste Management continues to promote the goals of Zero Waste California in partnership with local government, industry and the public. The division manages the*

approximate 93 million tons of waste generated each year by reducing waste whenever possible, decreasing greenhouse gas emissions, promoting the management of all materials to their highest and best use, and regulating the handling, processing and disposal of solid waste. California now diverts more than half of its waste away from landfills.

*The Division of Recycling manages **California's Beverage Container Recycling Program**, which seeks to achieve and maintain high recycling rates for a variety of beverage container types. To accomplish this, the division certifies recycling operations and materials processors, maintains industry compliance with program regulations, and provides technical assistance and education for consumers, local government, businesses, and organizations engaged in recycling.*

*CalRecycle also provides **grants and loans** to help California cities, counties, businesses, and organizations meet the State's waste reduction, reuse, and recycling goals. It also provides funds to clean up solid waste disposal sites; develops and promotes alternatives to the illegal disposal of used oil; develops technical standards and permit requirements for waste tire facilities; promotes reuse and recycling of electronic devices; encourages purchasing of environmentally preferable products; and promotes the development and use of new, more sustainable products and technologies that can benefit California's economy and environment.*

FOR BUSINESSES

The **Business Waste Reduction Resource Index** provides links to other CalRecycle web pages and websites to help address most commonly asked questions from businesses. <http://www.calrecycle.ca.gov/ReduceWaste/Business/Index.htm>

The **Waste Prevention Information Exchange** is a directory of informational resources on waste prevention organized alphabetically into numerous categories. <http://www.calrecycle.ca.gov/ReduceWaste/InfoExchange/default.htm>

Through the **Waste Prevention and Recycling at the Office** website, CalRecycle provides tips and guidance to businesses for implementing the "reduce, reuse, and recycle" philosophy. <http://www.calrecycle.ca.gov/ReduceWaste/Office/default.htm>

CalRecycle offers assistance to businesses that use recycled materials and fosters recycling markets. It also promotes the efficient collection and recycling

of secondary materials into high quality value-added products. Among the resources it offers to businesses are the following:

- Through the **Recycling Market Development Zone (RMDZ) Program**, CalRecycle offers below market rate loans to qualified recycling-based businesses. A business may receive up to \$2 million or 75 percent of a project's costs, whichever is less.
<http://www.calrecycle.ca.gov/RMDZ/>
- **The California Materials Exchange (CALMAX)** portal assists businesses, organizations, manufacturers, schools, and individuals by providing links to various on-line resources for exchanging materials. These on-line resources provide information on markets for non-hazardous materials that have traditionally been discarded.
Visit: <http://www.calrecycle.ca.gov/calmax/>
- CalRecycle maintains a **Recycled Content Products Directory (RCP)** database that lists thousands of products that contain recycled content. It can be accessed through the Internet at <http://www.calrecycle.ca.gov/RCP/>. If you have any questions, please call (916) 341-6606.

FOR RESIDENCES

CalRecycle has several resources to help people reduce, reuse, and recycle.

Waste reduction: In terms of packaging, CalRecycle recommends buying food in large quantities or in bulk, purchasing products that use less packaging, and taking steps to prevent the receipt of junk mail.

Reuse: CalRecycle provides tips on substituting reusable items for consumable items and on finding uses for things discarded, and references the following databases for reuse options: the Electronics Product Management Directory, the Construction and Demolition Debris Recyclers Directory, and the California Materials Exchange (CALMAX).

Recycle: CalRecycle's website provides links to resources that identify places where batteries, beverage containers, construction and demolition debris, electronics, and used motor oil can be recycled. It also provides information on composting and vermicomposting.

Finally, CalRecycle maintains on its website, the **RecycleStore**. This on-line store contains listings of products made of recycled content and contact information on the manufacturers of such products. The RecycleStore can be accessed at: <http://www.calrecycle.ca.gov/recyclestore/>

California Department of Toxic Substances Control (DTSC)

1001 "I" Street
Sacramento, CA 95814-2828
(916) 322-0476
<http://www.dtsc.ca.gov/>

DTSC's mission is to protect California's people and environment from harmful effects of toxic substances through the restoration of contaminated resources, enforcement, regulation and pollution prevention.

Californians Against Waste (CAW)

926 "J" Street, Suite 606
Sacramento, CA 95814
(916) 443-5422, Fax: (916) 443-3912
www.cawrecycles.org/

Californians Against Waste (CAW) is a nonprofit environmental organization that is dedicated to conserving resources, preventing pollution and protecting California's environment through the development, promotion and implementation of waste reduction and recycling policies and programs. It identifies, develops, promotes and monitors policy solutions to pollution and conservation problems posing a threat to public health and the environment.

United States Environmental Protection Agency

Office of Solid Waste (5305 West)
1200 Pennsylvania Avenue, Northwest
Washington, D.C. 20460
(800) 424-9346
<http://www.epa.gov/wastes/wycd/catbook/>

The U.S. Environmental Protection Agency publishes a Consumer Handbook for Reducing Solid Waste that offers tips on reducing solid waste based on the following four principles:

REDUCE the amount of trash discarded;

REUSE containers and products;

RECYCLE materials, use recycled materials, and purchase products containing recycled content; and

RESPOND to the solid waste problem by avoiding waste generating activities and expressing preferences for less waste.

Green Business Program of Santa Barbara County

The County of Santa Barbara serves as a partner in the Green Business Program of Santa Barbara County, a multi-jurisdictional program designed to recognize businesses that have implemented certain mandatory and a minimum number of voluntary measures in the following areas: solid waste reduction and recycling, environmentally preferable purchasing, energy and water conservation, and pollution prevention. In addition to becoming more sustainable by implementing such actions, businesses can save money and receive free publicity that acknowledges their efforts.

Background

From 1994 through 2007, the Green Awards Consortium honored up to five businesses, schools, and nonprofit organizations in Santa Barbara County each year that took actions above and beyond their basic missions to protect, preserve, and improve the environment in such areas as solid waste reduction and recycling, water conservation, energy conservation, hazardous waste reduction and recycling, and pollution prevention of the air, water, and soil. During its 14-year existence, over 70 local organizations were honored for their environmental achievements.

After learning of existing Green Business Programs in several areas in California and with the urging of the community, the Green Awards Consortium decided to replace the Green Awards Program with a multi-jurisdictional Green Business Program of Santa Barbara County (GBPSBC). In December 2008, the GBPSBC was launched with a breakfast honoring the first two certified "green" businesses in Santa Barbara County. During this first year, businesses in the following sectors were eligible to apply for certification: general office/retail, restaurants, lodging establishments, and automotive shops. During fiscal year 2012-13 (July 1, 2012 through June 30, 2013), wineries and dental offices will also become eligible. Other sectors will be added as checklists are developed and eventually, the program will be open to businesses in all sectors.

Under the GBPSBC, businesses will be offered positive incentives and free assistance to encourage them to implement actions that protect, preserve, and improve the environment above and beyond their compliance with applicable regulations. Businesses meeting these criteria will be certified as "green" businesses. Funding for the GBPSBC is being provided by a diverse group of agencies and organizations such as County of Santa Barbara agencies, municipalities, chambers of commerce, water districts, sanitary districts, utility companies, energy partnerships, waste haulers, and a nonprofit organization. The County of Santa Barbara is

administering the program and has contracted with a consultant to help implement the program.

Goals and Objectives

- To help businesses integrate environmental responsibility into their operations in a manner that is sustainable as well as profitable;
- To promote environmental ethics in Santa Barbara County by preventing pollution of the air, water, and soil;
- To establish a positive relationship among governmental agencies, the business community, and the public.

Benefits to Certified "Green" Businesses

- Will receive free, convenient, time-saving assistance;
- Will save money by lowering costs and increasing productivity;
- Will increase the ability to protect, preserve, and improve the environment;
- Will be able to attract new customers through free advertising in a directory of certified "green" businesses; advertising in chamber of commerce membership directories, websites, and publications; and recognition on website for GBPSBC: www.greenbizsbc.com.
- Will receive a sticker logo for display at business site;
- Will be recognized at annual luncheon;
- Will serve as a model for businesses on how to improve their environmental performance;
- Going through the certification process can foster a positive, proactive relationship with local compliance inspectors that can help avoid liability, fines, and other penalties;
- Will improve employee morale by ensuring a safer, healthier workplace.

Process to Become a Certified Green Business

A business that is interested in becoming a certified "green" business should contact the Green Business Program Director by calling (805) 705-1686 or by sending an e-mail message to: coordinator@greenbizsbc.org. The business will be asked to complete a brief application. The Program Director will then conduct a compliance check by consulting with applicable regulatory agencies to determine whether or not the business has any pending violations or past serious violations. The business will then be asked to complete an extensive checklist for its sector. The Program Director will discuss the checklist with the business by offering guidance and suggestions regarding required and optional measurements. The Program Director will also make the business aware of various programs that can save the business money. Once the business has implemented a sufficient number of measures to qualify for certification, it will notify the Program Director, who will then conduct a follow-up visit for verification purposes.

For more information, please contact the
Green Business Program Director at:
(805) 705-1686
or send an e-mail message to:
coordinator@greenbizsbc.org

You may also visit the program's website:
www.GreenBizSBC.org
